**Old Buildings New Designs** Charles Bloszies, 2013-07-02 Increasingly architects are hired to design new work for existing structures Whether for reasons of preservation sustainability or cost effectiveness the movement to reuse buildings presents a variety of design challenges and opportunities Old Buildings New Designs is an Architecture Brief devoted to working within a given architectural fabric from the technical issues that arise from aging construction to the controversy generated by the various project stakeholders to the unique aesthetic possibilities created through the juxtaposition of old and new *Old Buildings, New Designs* Charles Bloszies, 2012 19 eksempler p genbrug af gamle bygninger med

tilbygninger i nyt arkitektonisk design **Writing About Architecture** Alexandra Lange, 2012-03-20 Extraordinary architecture addresses so much more than mere practical considerations It inspires and provokes while creating a seamless experience of the physical world for its users It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes Writing About Architecture is a handbook on writing effectively and critically about buildings and cities Each chapter opens with a reprint of a significant essay written by a renowned architecture critic followed by a close reading and discussion of the writer s strategies Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer This important addition to the Architecture Briefs series is based on the author s design writing courses at New York University and the School of Visual Arts Lange also writes a popular online column for Design Observer and has written for Dwell Metropolis New York magazine and The New York Times Writing About Architecture includes analysis of critical writings by Ada Louise Huxtable Lewis Mumford Herbert Muschamp Michael Sorkin Charles Moore Frederick Law Olmsted and Jane Jacobs Architects covered include Marcel Breuer Diller Scofidio Renfro Field Operations Norman Foster Frank Gehry Frederick Law Olmsted SOM Louis Sullivan and Frank Lloyd Wright **Interactive Architecture** Michael Fox, 2016-06-07 Recent technological

developments in biology computation cybernetics engineering industrial design materials and robotics allow architecture to evolve beyond static functionality and become an active participant with the capacity to perceive react to and connect with humans and the natural world The first process based guide by Michael Fox and Miles Kemp introduced interactive architecture in 2009 and the past few years have seen its prototypical potential unleashed manifest in the eighteen inventive projects featured in this follow up the latest in our Architecture Briefs series Interactive Architecture Adaptive World illustrates how structures can process information make observations and utilize tools to translate natural systems and create seamlessly integrated environments from data driven light installations responsive sculptures and performative materials to smart highways dynamic spaces kinetic facades and adaptive buildings Ambitious projects from around the world including Abu Dhabi Indianapolis Los Angeles New York City San Francisco Frankfurt London Paris Sochi and Zurich are illuminated by photographs diagrams and renderings Cultural Heritage Preservation for Vulnerable Territories Francesco

Augelli, Matteo Rigamonti, 2024-08-30 This book frames the many sided fragilities of Hunan Province s Heritage It originates from a ten year long international cooperation between Politecnico di Milano Italy dealing from the Seventies with architectural preservation and adaptive reuse s teaching and research activities and the School of Architecture of the Hunan University of Changsha China From the Preservation of Landscape Heritage to Historical cities and settlements preservation and ancient and modern architecture preservation the tangible and intangible cultural heritage protection and valorization from the social repercussions to the environmental issues the contributions introduce different aspects of Hunan territory s cultural richness and fragility The common aim of the rich mosaic of case studies presented at different scales is mapping understanding and considering the weaknesses of sites to be addressed sustainably This is done while seeking cultural resilience driven preservation solutions regarding operational guidelines and policies risk assessment social awareness and teaching innovation There is also a focus on virtuous multi scale management of advanced digital technologies used to describe the current conditions and to drive the compatible design methodology on cultural heritage     Sustainable Design

David Bergman, 2013-07-02 Written for students and practitioners in the fields of architecture and interior design our new Architecture Brief Sustainable Design provides a concise overview of all the techniques available for reducing the energy footprint of structures and spaces With clear simple language and a practical can do approach author David Bergman covers everything from the profession s ethical responsibility to design structures and spaces that sustain our natural resources to specific considerations such as rainwater harvesting graywater recycling passive heating techniques solar orientation green roofs wind energy daylighting indoor air quality material evaluation and specification and how to work with green building certification programs     *Urban Composition*

Mark C. Childs, 2013-07-02 Cities and towns are among humanity s greatest achievements yet no single individual or organization creates them The buildings streets and gardens of even a small town embody substantial investments of money natural resources and political capital Much more than the sum of its parts a settlement s vitality comes from its collective composition Sometimes the cities and towns that emerge are glorious places but too frequently they have only fragments of greatness or are soulless and environmentally unhealthy Our new Architecture Brief Urban Composition shows architects planners artists and engineers of individual projects how they can best fulfill their public trust to help make meaningful urban places Each chapter contains a set of design queries followed by a discussion illustrations and references for further research This accessible primer on urban design provides guidelines for designing buildings or plans for large cities or small towns Urban Composition showcases projects across the United States and internationally in metropolitan areas such as Chicago Seattle and London and small communities such as Marfa Texas

Material Strategies Blaine Brownell, 2013-07-02 Blaine Brownell s best selling Transmaterial series has introduced designers to hundreds of emergent materials that have the potential to transform our built environment In our new Architecture Brief Material Strategies Brownell shows architects how creative applications of these materials achieve such

transformations Chapters based on fundamental material categories examine historical precedents current opportunities and future environmental challenges Case studies featuring detailed illustrations showcase pioneering buildings from today's most forward thinking architectural firms     The Architecture Annual 2005-2006. **The Architecture Annual 2004-2005 ,2006**     Transformative Pedagogy in Architecture and Urbanism Ashraf M. Salama,2021-03-04 First published in 2009 Transformative Pedagogy in Architecture and Urbanism is a detailed round of pedagogical dialogue on architecture and urbanism that reset the stage for debating future visions of transformative pedagogy and its impact on design education Structured in five chapters the book presents a wide range of innovative concepts and practical methodologies for teaching architectural and urban design It traces the roots of architectural education and offers several contrasting ideas and strategies of design teaching practices Transformative Pedagogy in Architecture and Urbanism will appeal to those with an interest in architectural and urban design and architectural and design education     *Spatial Design Education* Ashraf M. Salama,2016-03-09 Design education in architecture and allied disciplines is the cornerstone of design professions that contribute to shaping the built environment of the future In this book design education is dealt with as a paradigm whose evolutionary processes underpinning theories contents methods tools are questioned and critically examined It features a comprehensive discussion on design education with a focus on the design studio as the backbone of that education and the main forum for creative exploration and interaction and for knowledge acquisition assimilation and reproduction Through international and regional surveys the striking qualities of design pedagogy contemporary professional challenges and the associated sociocultural and environmental needs are identified Building on twenty five years of research and explorations into design pedagogy in architecture and urban design this book authoritatively offers a critical analysis of a continuously evolving profession its associated societal processes and the way in which design education reacts to their demands Matters that pertain to traditional pedagogy its characteristics and the reactions developed against it in the form of pioneering alternative studio teaching practices Advances in design approaches and methods are debated including critical inquiry empirical making process based learning and Community Design Design Build and Live Project Studios Innovative teaching practices in lecture based and introductory design courses are identified and characterized including inquiry based active and experiential learning These investigations are all interwoven to elucidate a comprehensive understanding of contemporary design education in architecture and allied disciplines A wide spectrum of teaching approaches and methods is utilized to reveal a theory of a trans critical pedagogy that is conceptualized to shape a futuristic thinking about design teaching Lessons learned from techniques and mechanisms for accommodation adaptation and implementation of a trans critical pedagogy in education are conceived to invigorate a new student centered evidence based design culture sheltered in a wide variety of learning settings in architecture and beyond     *Architectural Transformations in the Islamic World ,1986*     **ARCHITECTURE, ARCHAEOLOGY AND CONTEMPORARY CITY**

**PLANNING "State of knowledge in the digital age" - Proceedings of the 2015 workshop** Giorgio Verdiani, Per Cornell, Pablo Rodriguez-Navarro, Architecture in Dialogue with an Activated Ground Urs Bette, 2020-03-30 Architecture in Dialogue with an Activated Ground sets out to validate the role of the unreasonable in the design process Using case study projects architect Urs Bette gives an insight into the epistemological processes of his creative practice and unveils the strategies he deploys in order to facilitate the poetic aspects of architecture within a discourse whose evaluation parameters predominantly involve reason Themes discussed include the emergence of space from the staged opposition between the architectural object and the site and the relationship between emotive cognition and analytic synthesis in the design act In both cases there is a necessary engagement with forms of unreasonable thought action or behaviours By arguing for the usefulness and validity of the unreasonable in architecture and by investigating the performative relationship between object and ground Bette contributes to the discourse on extensions growth and urban densification that tap into local histories and voices including those of the seemingly inanimate the architecture itself and the ground it sits upon to inform the site related production of architectural character and space In doing so he raises debates about the values pursued in design approval processes and the ways in which site relatedness is both produced and judged **At Home in New Zealand** Barbara Lesley Brookes, 2000 The American Architect and Building News, 1885 *Bibliography of Art and Architecture in the Islamic World (2 Vol. Set)* Susan Sinclair, C. H. Bleaney, Pablo García Suárez, 2012 Following the tradition and style of the acclaimed Index Islamicus the editors have created this new Bibliography of Art and Architecture in the Islamic World The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies **The Architect**, 1926 **Architecture in an Age of Uncertainty** Benjamin Flowers, 2016-04-15 In the past two decades economic bubbles inflated and architectural spending around the globe reached fever pitch In both well established centers of capital accumulation and far flung locales audacious building projects sprang up while the skyscraper heretofore more commonly associated with American capitalism seemed as if it might pack up and relocate to Dubai and Shanghai Of course much has changed in the past couple of years In formerly free spending Dubai the tallest building in the world is now is named after the president of Abu Dhabi after he stepped in with last minute debt financing In cities across the United States housing prices have nose dived and cleared lots sit ready for commercial redevelopment that likely won't take place for another decade Similar stories are not hard to find in many other nations Architecture firms that swelled in flush days are jettisoning employees at a startling rate In the context of economic instability and its attendant social and political consequences this edited volume brings together scholars critics and architects to discuss the present state of uncertainty in the practice and discipline of architecture The chapters are organized into three main areas of inquiry economics practice and technology Within this larger framework authors explore

issues of security ecological design disaster architecture the future of architectural practice and the ethical obligations of the social practice of design In doing so it argues that this period has actually afforded architecture a valuable moment of self reflection where alternative directions for both the theory and practice of architecture might be explored rather than continuing with an approach which was so nurtured by capitalist prosperity and affluence
