1 a Figure 1a shows two masses, A and B, attached to a light rope. The rope passes over a fixed pulley and the mass B is held at rest in contact with the ground. The mass of A is 3.0 kg.

The mass of B is 1.8 kg.

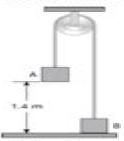

Figure 1a

i Calculate the tension in the rope.

ii The mass B is now released and A accelerates towards the ground. You may assume that air resistance is negligible, and that there is no friction between the rope and the pulley.
Calculate:
1 the downward acceleration of A

2 the time taken for A to reach the ground.
