on which to anchor new regional coalitions alliances and allies to better serve their respective national agendas This book explores the Indo Pacific as an ambiguous and hotly contested regional security construction It critically examines the major drivers behind the revival of classical geopolitical concepts and their deployment through different national lenses The book also analyses the presence of India and the U S in the Indo Pacific and the manner in which China has reacted to their positions in the Indo Pacific to date It suggests that national constructions of the Indo Pacific region are more informed by domestic political realities anti Chinese bigotries distinctive properties of 21st century U S hegemony and narrow nation statist sentiments rather than genuine pan regional aspirations The Rise and Return of the Indo Pacific argues that the spouting of contested depictions of the Indo Pacific region depend on the fixed geo strategic lenses of nation states but what is also important is the re emergence of older ideas a classical conceptual revival based on early to mid 20th century geopolitical ideas in many of these countries The book deliberately raises the issue of the sea and constructions of nature as these symbols are indispensable parts of many of these Indo Pacific regional narratives Despite the existence of diverse nation statist pan and sub regional discourses the narratives of the most powerful states still dominate 21st century Indo Pacific statecraft The term Indo Pacific has the potential of unsettling various existing bilateral and multilateral geopolitical equations within the Indian Ocean region Despite substantial heterogeneity in Indo Pacific regional imaginations the most dominant stories and maps are crafted and disseminated by the most dominant nation in this case the U S as it grapples with new ways of retaining its hegemony into the 21st century
