The possibility of creating new ways of existing beyond human rights has been left significantly under examined until now Having as its starting point the ferocious yet brief critique on human rights of one of the most prominent French philosophers of the 20th century Gilles Deleuze the book argues that Deleuze s critique is not only compatible with his broader thought but that it has the potential to give a new impetus to the current critiques of human rights within the disciplinary borders of legal and political theory The book draws upon Deleuze s broader thought but also radical legal and political theory and continental philosophy In particular it investigates and expands on two of Deleuze's most important notions namely those of immanence and becoming

and their relation to the philosopher's critique of human rights In doing so it argues that these two notions are capable of questioning the dominant and dogmatic position that human rights enjoy The Oxford Handbook of the Ends of **Empire** Martin Thomas, Andrew Thompson, 2018-12-06 The Oxford Handbook of the Ends of Empire offers the most comprehensive treatment of the causes course and consequences of the ends of empire in the twentieth century. The volume s contributors convey the global reach of decolonization with chapters analysing the empires of Western Europe Eastern Europe China and Japan The Handbook combines broad regional treatments of decolonization with chapter contributions constructed around particular themes or social issues It considers how the history of decolonization is being rethought as a result of the rise of the new imperial history and its emphasis on race gender and culture as well as the more recent growth of interest in histories of globalization transnational history and histories of migration and diaspora humanitarianism and development and human rights The Handbook in other words seeks to identify the processes and commonalities of experience that make decolonization a unique historical phenomenon with a lasting resonance In light of decades of historical and social scientific scholarship on modernization dependency neo colonialism failed state architectures and post colonial conflict the obvious question that begs itself is when did empires actually end In seeking to unravel this most basic dilemma the Handbook explores the relationship between the study of decolonization and the study of globalization It connects histories of the late colonial and post colonial worlds and considers the legacies of empire in European and formerly colonised societies 180 Day Access Global Political Economy Erin Hannah, What constitutes Global Political Economy In whose interest is GPE constructed and by whom How can injustices in GPE best be redressed These are some of the key guestions addressed in the 7th edition of this highly regarded highly regarded textbook As an ever evolving field subject to constant changes and developments the new edition provides a comprehensive introduction to the subject written by leading experts in the field Edited by Dr Erin Hannah the 7th edition surveys major contemporary issues and debates in GPE while being attuned to the silences marginalizations and exclusions that predominate the field By integrating a wide range of theoretical approaches rich empirical material non western viewpoints and diversity of contributors the 7th edition provides enhanced coverage of the central axes of inequality in GPE and centers topics such as colonialism race gender North South divides and everyday life **Library Journal** ,2006 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately Memory and the Moving Image Isabelle McNeill, 2012-05-23 This book investigates the role of the moving image in cultural memory taking into account the impact of digital technologies on visual culture Sheep Alan Butler, 2013-01-16 Gripping tale of the history of our civilisation through man's relationship with sheep **Constant Disconnection** Kenzie Burchell, 2024-08-20 The weight of constant digital connection is the default condition of working life home life and everyday personal life driving us to engage more with platforms than with people a new state of constant disconnection that we cannot

escape Overflowing email inboxes deluges of mobile phone notifications and torrents of social media posts the flow of communication in its abundance is today s individualized interface for interpersonal and professional practices Communication technologies and their use are both the needle and the thread of the wider social tapestry of everyday contemporary life This ever changing communication environment is where the neoliberal economic policies of the West and the commercial imperatives of the platform and data mining industries meet It is where the contradictions they produce can be felt day to day by citizens turned users How does it feel to live at the pressure points of intersecting economic realities and why does it matter Drawing on extensive sociological research Burchell examines how individuals try to manage connection as participation in everyday life and how on a larger scale the ever expanding knowledge communication and data driven economies depend on the very pressures that result from our disparate communication needs With so much time spent managing the pressures of our communication environment we often overlook the way media technologies produce systemic tensions that are reshaping how we interact with each other and what we understand to be social connection today Ideas of Europe since 1914 M.
