

## INTRODUCTION - SAFETY PRECAUTIONS AND WARRANTY

- Hitch only to the drawbar and hitch points recommended, and never above the centre line of the rear axle.
- When the tractor is stopped, apply the parking brake securely.
- Never modify or remove any part of the equipment.
- Keep others away from your area of work.
- Never use attachments unless they are properly matched to your tractor.

### SAFETY - ROPS

#### Roll Over Protective Structures

A Roll Over Protective Structure (ROPS) and seat belt is fitted as standard equipment to the tractor at the time of factory assembly. If the ROPS was deleted by the original purchaser or has been removed, it is recommended that you equip your tractor with a Roll Over Protective Structure and a seat belt. ROPS are effective in reducing injuries during overturn accidents. Overturning a tractor without ROPS can result in serious injury or death.

If fold down ROPS are installed do not wear seat belt when the ROPS are in the folded down position.

#### Operation

- Before using the tractor ensure that the ROPS frame is not damaged, that it is securely fastened to the tractor and if a hinged section is fitted that it is in the raised position and secured.
- If the ROPS has been removed from the tractor, or folded down for a specific operation, it must be refitted or erected immediately using the proper hardware and applying the recommended torque values.
- DO NOT attach chains, ropes, or cables to the ROPS for pulling purposes; this will cause the tractor to tip backwards. Always pull from the tractor drawbar.
- Always wear your seat belt - adjusted snugly. Never wear the seat belt if the tractor is not equipped with upright ROPS or Safety Cab.
- Check the seat belt for damage. A damaged seat belt must be replaced (Fig. 2).

#### Damage to the ROPS

If the tractor has rolled over or the ROPS has been damaged (such as striking an overhead object during transport), the ROPS must be renewed to provide the original degree of protection.

After an accident, check for damage to the ROPS, operator's seat, seat belt and seat belt mountings. Before you operate the tractor, replace all damaged parts.

**DO NOT WELD, DRILL, BEND OR STRAIGHTEN THE ROPS.** To do so reduces the protection it offers.
