of only a few optical cycles Moreover the monograph introduces several methods to achieve power scalability of compression
and stabilization techniques All experimental approaches are compared in detail and may serve as a guideline for developing
high power waveform controlled few cycle light sources which offer tremendous potential to exploit extreme nonlinear
optical effects at unprecedentedly high repetition rates and to establish table top infrared light sources with a unique
combination of brilliance and bandwidth As an example the realization of a multi Watt multi octave spanning mid infrared

subsequently presents additional details of previously published research results and establishes a connection between them
It therefore addresses both newcomers to and experts in the field of high power ultrafast laser development
