Michael's Racing Machine Lawrence F. Lowery, 2014-07-01 While building a soapbox racing car a pair of friends provide an easy to understand lesson in how simple machines are all around us making our work more efficient Michael and Luci show readers that a broom is a lever nails are wedges and a screwdriver is both a lever and a wheel and axle The two also prove that curious children can be just like scientists making observations and using how and what questions to explore physical science principles they encounter all the time Michael's Racing Machine is part of the I Wonder Why book series written to ignite the curiosity of children in grades K 6 while encouraging them to become avid readers These books explore the marvels of light color machines sound and other phenomena related to physical science Included in each volume is a Parent Teacher Handbook with coordinating activities The I Wonder Why series is written by an award winning science educator and published by NSTA Kids a division of NSTA Press Sounds Are High, Sounds Are Low Lawrence F.

Lowery, 2014-07-01 Here's humorous proof of just how fun it is to observe with your ears A whimsical introduction to pitch and volume this book practically begs young scientists to read it aloud And why not It's the best way to compare the differences among a telephone's high ring a cow's low moo a fire truck's loud clang and a flying string band's plinkety plink plunk Sounds Are High Sounds Are Low is ideal for beginning readers and hilarious practice for future sound effects pros Sounds Are High Sounds Are Low is part of the I Wonder Why book series written to ignite the curiosity of children in grades K 6 while encouraging them to become avid readers These books explore the marvels of light color machines sound and other phenomena related to physical science Included in each volume is a Parent Teacher Handbook with coordinating activities The I Wonder Why series is written by an award winning science educator and published by NSTA Kids a division of NSTA Press

Light and Color Lawrence F. Lowery, 2014-07-01 This book unfolds as a series of observations about light including where it comes from how it bounces off of people and objects and what we mean when we say the colors of a rainbow are the colors in light Throughout the text informal experiments prompt young scientists to learn by doing and impressionistic drawings bring the mysteries of light and color to life By the book's end students will have a useful foundation for middle school and beyond when they'll learn about energy wavelengths and the electromagnetic spectrum Light and Color is part of the I Wonder Why book series written to ignite the curiosity of children in grades K 6 while encouraging them to become avid readers These books explore the marvels of light color machines sound and other phenomena related to physical science Included in each volume is a Parent Teacher Handbook with coordinating activities The I Wonder Why series is written by an award winning science educator and published by NSTA Kids a division of NSTA Press **Dark as a**

Lowery, 2014-07-01 Time for shadow play After reading about how light and objects interact to create shadows young children won't be able to resist twisting wiggling bending and shaking to see the phenomenon for themselves To add to the enjoyment Dark as a Shadow is written in lively rhymes making it even more fun to learn the science behind
