Energy-Wise Landscape Design Sue Reed, 2010-04-01 An inspiring instructional handbook for transforming idealism into social change The pursuit of freedom and justice is a timeless one but new activists may not know where to begin while more experienced ones often become jaded or fatigued The task of constructing a new society free from oppression and inequality can be overwhelming Tools for facilitating motivation engagement and communication can mean the difference between failure and success for activists and social movements Educating for Action collects the voices of activists whose combined experience in confronting injustice has generated a wealth of key insights for creating social change This practical guide explores such topics as Community activism and direct democracy Conflict negotiation communication and rhetoric Law the educational system and lifestyle activism Social media skills conference planning and online organizing Written in an inspirational tone Educating for Action consciously straddles the line between street activism and classroom instruction Bridging the gap between these two worlds makes for an engaging and instructive manual for social justice helping students teachers and larger activist communities turn their idealism into action Jason Del Gandio is a scholar activist and assistant professor of rhetoric and public advocacy at Temple University He is the author of Rhetoric for Radicals A Handbook for 21st Century Activists Anthony J Nocella II is a scholar activist and senior fellow of the Dispute Resolution Institute at the Hamline Law School He is a long time anti racism youth justice prison abolition hip hop animal disability and Earth liberation activist and has published over fifty scholarly articles and book chapters and sixteen books

Hydroelectric Energy Bikash Pandey, Ajoy Karki, 2016-11-17 Providing essential theory and useful practical techniques for implementing hydroelectric projects this book outlines the resources power generation technologies applications and strengths and weaknesses for hydroelectric technologies Emphasizing the links between energy and the environment it serves as a useful background resource and facilitates decision making regarding which renewable energy technology works best for different types of applications and regions Including examples real world case studies and lessons learned each chapter contains exercise questions references and ample photographs and technical drawings from actual micro hydropower plants

Gravity-Driven Water Flow in Networks Gerard F. Jones, 2011-12-29 Gravity driven water flow networks are a crucial method of delivering clean water to millions of people worldwide and an essential agricultural tool This book provides an all encompassing guide to designing these water networks combining theory and case studies It includes design formulas for water flow in single or multiple uniform or non uniform diameter pipe networks case studies on how systems are built used and maintained comprehensive coverage of pipe materials pressure ratings and dimensions and over 100 illustrations and tables It is a key resource both for working engineers and engineering students and instructors

Energy Resources and Systems Tushar K. Ghosh, Mark A. Prelas, 2011-06-27 This second volume of Energy Resources and Systems is focused on renewable energy resources Renewable energy mainly comes from wind solar hydropower geothermal ocean bioenergy

ethanol and hydrogen Each of these energy resources is important and growing For example high head hydroelectric energy is a well established energy resource and already contributes about 20% of the world s electricity Some countries have significant high head resources and produce the bulk of their electrical power by this method However the bulk of the world s high head hydroelectric resources have not been exploited particularly by the underdeveloped countries Low head hydroelectric is unexploited and has the potential to be a growth area Wind energy is the fastest growing of the renewable energy resources for the electricity generation Solar energy is a popular renewable energy resource Geothermal energy is viable near volcanic areas Bioenergy and ethanol have grown in recent years primarily due to changes in public policy meant to encourage its usage Energy policies stimulated the growth of ethanol for example with the unintended side effect of rise in food prices Hydrogen has been pushed as a transportation fuel The authors want to provide a comprehensive series of texts on the interlinking of the nature of energy resources the systems that utilize them the environmental effects the socioeconomic impact the political aspects and governing policies Volume 1 on Fundamentals and Non Renewable Resources was published in 2009 It blends fundamental concepts with an understanding of the non renewable resources that dominate today s society The authors are now working on Volume 3 on nuclear advanced energy resources and nuclear batteries consists of fusion space power systems nuclear energy conversion nuclear batteries and advanced power fuel cells and energy storage Volume 4 will cover environmental effects remediation and policy Solutions to providing long term stable and economical energy is a complex problem which links social economical technical and environmental issues It is the goal of the four volume Energy Resources and Systems series to tell the whole story and provide the background required by students of energy to understand the complex nature of the problem and the importance of linking social economical technical and environmental issues

Renewable Energy Systems Dilwyn Jenkins, 2013-05-07 This book is the long awaited guide for anyone interested in renewables at home or work It sweeps away scores of common misconceptions while clearly illustrating the best in renewable and energy efficiency technologies A fully illustrated guide to renewable energy for the home and small business the book provides an expert overview of precisely which sustainable energy technologies are appropriate for wide spread domestic and small business application The sections on different renewable energy options provide detailed descriptions of each technology along with case studies installation diagrams and colour photographs showing precisely what is possible for the average household The chapter on how to select the renewable technology most appropriate for ordinary homes and businesses summarizes this analysis in a neat and easy to use table and demonstrates with examples exactly how to assess your local renewable resources Renewable technologies covered include wood energy wind power solar photovoltaics solar thermal passive solar geothermal and air to air heat pumps as well as water or hydro based energy systems plus the all important subject of energy efficiency Whilst written to be accessible to a wide audience the book is targeted at readers who are keen to work with renewable technologies students building engineers architects
