Chapter 6

Inputs and Production Functions

Solutions to Review Questions

1. We said that the production function tells us the *maximum* output that a firm can produce with its quantities of inputs. Why do we include the word *maximum* in this definition?

The production function tells us the maximum volume of output that may be produced given a combination of inputs. It is possible that the firm might produce less than this amount of output due to inefficient management of resources. While it is possible to produce many levels of output with the same level of inputs, some of which are less technically efficient than others, the production function gives us the upper bound on (the *maximum* of) the level of output.

2. Suppose a total product function has the “traditional shape” shown in Figure 6.2. Sketch the shape of the corresponding labor requirements function (with quantity of output on the horizontal axis and quantity of labor on the vertical axis).

The labor requirements function, which is the inverse of the production function, tells us the minimum amount of labor that is required to produce a given amount of output.

Introducing Anthropological Economics Sujay Rao Mandavilli, This paper attempts to merge the concepts and theoretical frameworks of the disciplines of Anthropology and Economics and attempts to create a new sub field in Economics called Anthropological Economics which is mired in Anthropological concepts and principles and seeks to maximize not only human welfare and happiness but also wealth maximization across cultures while considering both the psychic unity of man universal human needs and culture specific factors Thus Anthropological Economics is expected to be inter related to other disciplines of Economics but remain complementary to them i e it is not expected that it will intrude into other sub fields of economics replace them or override their principles in any way It will therefore draw upon other aspects of economic theory and enrich them suitably It is therefore expected that all aspects of Economic theory will be taken into consideration for policy formulation and decision making including those of Anthropological economics and independent context specific judgment will always be applied The new proposed field of Anthropological Economics proposes to take the idea of Human Welfare to its logical conclusion by extending the work already carried out in various sub disciplines of economics and integrating it more tightly with various concepts in Anthropology Many new tools and techniques are therefore proposed as a part of this paper and we believe these will suitably enrich the field of Economics as well While many attempts have been made in the past to integrate the fields of Anthropology and Economics we hope this endeavour will take this exercise to a much higher level by creating a new generation of Anthroeconomists We also hope it will eventually help move mainstream economics away from Neo classical approaches to Anthropological and human centric approaches

Plotting the contours for India's economic development: Why this could be a role model for other developing nations as well Sujay Rao Mandavilli, 2024-05-05 In a paper published by us a couple of years ago on Anthropological Economics the year 2020 to be precise we had mooted the idea of trickle up economics as contrasted with the rather more popular and mundane trickle down economics We had argued that the latter would be somewhat dubious iffy inconsistent and non replicable in a wide variety of situations particularly in the case of developing nations We had argued that trickle up economics would actually boost wide ranging economic growth and add to the Gross domestic product in a big way While we never were and still are not big fans of socialism we have always argued and will continue to argue for balanced diversified and equitable economic development models There is a world of

difference between the two We had also argued that the economic models pursued by advanced industrial nations will not by and large work in developing nations Thus American style economic conservatism is meaningless in Indian political and economic contexts There are fundamental differences in ground realities between these two different sets of nations It would make eminent sense for the readers of this book to read the aforesaid paper as well as we will not be able to reproduce the contents in this paper in its entirety here many of the proposals advocated and espoused in this paper can also be implemented by developing economies though rather much more slowly We focus only on the meat here The British National Bibliography Arthur James Wells,2001 **Microeconomics** David Besanko,Ronald Ray Braeutigam,2005 This second edition of Microeconomics is filled with learning by doing problems that give students a chance to make economics their own These fully worked out problems provide a step by step road map to help students solve numerical problems Each problem correlates to similar practice problems at the end of each chapter In addition the authors include many extensive real world examples in the text These examples are contemporary applications of the theory and are longer and more extensive to show the evolution of the example Each chapter opens with an example to draw readers into the topic
