Beyond Foraging and Collecting Ben Fitzhugh, Junko Habu, 2002-10-31 This volume includes new research on the theoretical implications regarding the mechanisms of change in the geographical distribution of hunter gatherer settlement and land use It focuses on the long term changes in the hunter gatherer settlement on a global scale including research from several continents It will be of interest to archaeologists and cultural anthropologists working in the field of the forager collector model throughout the world

Key Issues in Hunter-Gatherer Research Linda J. Ellanna, Ernest S. Burch, 2020-08-25 Hunter gatherer research has experienced enormous expansion over the past three decades In the late 1950s less than a score of anthropologists were actively engaged in issue oriented studies of foraging populations Since then the number of active researchers has grown into the hundreds This book offers the most up to date anthology of papers on hunter gatherer research and contains possibly the most comprehensive bibliography on hunter gatherers ever published It will be essential reading for all students of hunter gatherer societies

Hunter-Gatherers in History, Archaeology and Anthropology Alan Barnard, 2020-05-26 The study of hunter gatherers has had a profound impact on thinking about human nature and about the nature of society The subject has especially influenced ideas on social evolution and on the development of human culture Anthropologists and archaeologists continue to investigate living hunter gatherers and the remains of past hunter gatherer societies in the hope of unearthing the secrets of our ancestors and learning something of the natural existence of humankind *Hunter Gatherers in History Archaeology and Anthropology* provides a definitive overview of hunter gatherer historiography from the earliest anthropological writings through to the present day What can early visions of the hunter gatherer tell us about the societies that generated them How do diverse national traditions such as American Russian and Japanese manifest themselves in hunter gatherer research What is the most up to date thinking on the subject and how does it reflect current trends within the social sciences This book provides a much needed overview of the history of thought on one of science s most intriguing subjects It will serve as a landmark text for

anthropologists archaeologists and students researching anthropological theory or the history of social anthropology and related disciplines

Hunter-Gatherers Robert L. Bettinger, 2013-11-11 Hunter gatherers are the quintessential anthropological topic They constitute the subject matter that in the last instance separates anthropology from its sister social science disciplines psychology sociology economics and political science In that central position hunter gatherers are the acid test to which any reasonably comprehensive anthropological theory must be applied Several such theories some narrow some broad are examined in light of the hunter gatherer case in this book My purpose then is that of a review of ideas rather than of a literature I do not probably could not survey all that has been written about hunter gatherers Many more works are ignored than considered That is not because the ones ignored are uninteresting but because it is my broader purpose to concentrate on certain theoretical contributions to anthropology in which hunter gatherers figure most prominently The book begins with two chapters that deal with the history of anthropological research and theory in relation to hunter gatherers The point is not to present a comprehensive or even handed accounting of developments Rather I sketch a history of selected ideas that have determined the manner in which social scientists have viewed and thus studied hunter gatherers This lays the groundwork for subjects subsequently addressed and establishes two fundamental points First the social sciences have always portrayed hunter gatherers in ways that serve their theories in short hunter gatherer research has always been a theoretical enterprise Second these theoretical treatments have generally been either evolutionary or materialist or both in perspective

Hunters and Gatherers in the Modern World Peter P. Schweitzer, Megan Biesele, Robert K. Hitchcock, 2000 In light of negotiations now going on between people who rely on wild plants and animals and the governments of their territories about civil political social economic and cultural rights anthropologists explore dimensions of culture and pressures as they are manifested in particular peoples Their 27 papers from an August 1993 conference in Moscow Russian cover warfare and conflict resolution resistance identity and the state ecology demography and market issues gender and representation and world view and religious determination The examples come from most of the world's continents Annotation copyrighted by Book News Inc Portland OR

Perspectives on Africa Roy Richard Grinker, Stephen C. Lubkemann, Christopher B. Steiner, 2010-05-17 The second edition of *Perspectives on Africa* A Reader in Culture History and Representation is both an introduction to the cultures of Africa and a history of the interpretations of those cultures Key essays explore the major issues and debates through a combination of classic articles and the newest research in the field Explores the dynamic processes by and through which scholars have described and understood African history and culture Includes selections from anthropologists historians philosophers and critics who collectively reveal the interpenetration of ideas and concepts within and across disciplines regions and historical periods Offers a combined focus on ethnography and theory giving students the means to link theory with data and perspective with practice Newly revised and updated edition of this popular text with 14 brand new chapters and two new sections Conflict and Violent

Transformations and Development Governance and Globalization *Farmers as Hunters* Susan Kent, 1989-08-31 Farmers as hunters analyses from an essentially ethnographic perspective the role of hunters in small scale farming societies The twelve contributors examine the effects of hunting and mobility on behaviour diet economy and material culture at both culture specific and cross cultural levels The influence of sedentism and the increasing use of domesticates is also explored across a wide range of societies from the American southwest and Amazonian to Africa New Guinea and the Phillipines Differing perceptions of the status of animals and plants are reviewed and cultural values are throughout given due weight in a field where discussion too often verges on the economically deterministic *Borneo Studies in History, Society and Culture* Victor T. King, Zawawi Ibrahim, Noor Hasharina Hassan, 2016-08-12 This edited book is the first major review of what has been achieved in Borneo Studies to date Chapters in this book situate research on Borneo within the general disciplinary fields of the social sciences with the weight of attention devoted to anthropological research and related fields such as development studies gender studies environmental studies social policy studies and cultural studies Some of the chapters in this book are extended versions of presentations at the Borneo Research Council's international conference hosted by Universiti Brunei Darussalam in June 2012 and a Borneo Studies workshop organised in Brunei in 2012 The volume examines some of the major debates and controversies in Borneo Studies including those which have served to connect post war research on Borneo to wider scholarship It also assesses some of the more recent contributions and interests of locally based researchers in universities and other institutions in Borneo itself The major strength of the book is the inclusion of a substantial amount of research undertaken by scholars working and teaching within the Southeast Asian region In particular there is an examination of research materials published in the vernacular notably the outpouring of work published in Indonesian by the Institut Dayakologi in Pontianak In doing so the book also addresses the urgent matters which have not received the attention they deserve specifically subjects themes and issues that have already been covered but require further contemplation elaboration and research and the scope for disciplinary and multidisciplinary collaboration in Borneo Studies The book is a valuable resource and reference work for students and researchers interested in social science scholarship on Borneo and for those with wider interests in Indonesia and Malaysia and in the Southeast Asian region

The Cambridge Encyclopedia of Hunters and Gatherers Richard B. Lee, Richard Heywood Daly, Richard Daly, 1999-12-16 Hunting and gathering is humanity's first and most successful adaptation Until 12 000 years ago all humanity lived this way Surprisingly in an increasingly urbanized and technological world dozens of hunting and gathering societies have persisted and thrive worldwide resilient in the face of change their ancient ways now combined with the trappings of modernity The Encyclopedia is divided into three parts The first contains case studies by leading experts of over fifty hunting and gathering peoples in seven major world regions There is a general introduction and an archaeological overview for each region Part II contains thematic essays on prehistory social life gender music and art health religion and

indigenous knowledge The final part surveys the complex histories of hunter gatherers encounters with colonialism and the state and their ongoing struggles for dignity and human rights as part of the worldwide movement of indigenous peoples

Mfecane Aftermath Carolyn Hamilton,1995 The idea that the period of social turbulence in the nineteenth century was a consequence of the emergence of the powerful Zulu kingdom under Shaka has been written about extensively as a central episode of southern African history Considerable dynamic debate has focused on the idea that this period the mfecane left much of the interior depopulated thereby justifying white occupation One view is that the time of troubles owed more to the Delagoa Bay Slave trade and the demands of the labour hungry Cape colonists than to Shaka s empire building But is there sufficient evidence to support the argument The Mfecane Aftermath investigates the very nature of historical debate and examines the uncertain foundations of much of the previous historiography *Literary History of Canada* William H. New,Carl Berger,Alan Cairns,Fransess G. Halpenny,Henry Kreisel,Douglas Lochhead,Philip Stratford,Clara Thomas,1990-12-15 This new volume of the Literary History of Canada covers the continuing development of English Canadian writing from 1972 to 1984 As with the three earlier volumes this book is an invaluable guide to recent developments in English Canadian literature and a resource for both the general reader and the specialist researcher The contributors to this volume are Laurie Ricou David Jackel Linda Hutcheon Philip Stratford Barry Cameron Balachandra Rajan Robert Fothergill Brian Parker Cynthia Zimmerman Frances Frazer Edith Fowke Bruce G Trigger Alan C Cairns Douglas Williams Carl Berger Shirley Neuman Raymond S Corteen and Fransess G Halpenny **The Oxford Handbook of the Archaeology and Anthropology of Hunter-gatherers** Vicki Cummings,Peter Jordan,Marek Zvelebil,2014 This book provides a comprehensive review of hunter gatherer studies undertaking detailed regional and thematic case studies that span the archaeology history and anthropology of hunter gatherers concluding with an in depth review of the main opportunities research questions and moral obligations that lie ahead Handbook of Archaeological Theories R. Alexander Bentley,Herbert D. G. Maschner,Christopher Chippindale,2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology

The Archaeology of Prehistoric Coastlines Geoff Bailey,John Parkington,1988-04-07 The Archaeology of Prehistoric Coastlines offers a conspectus of recent work on coastal archaeology examining the various ways in which hunter gatherers and farmers across the world exploited marine resources such as fish shellfish and waterfowl in prehistory Changes in sea levels and the balance of marine ecosystems have altered coastal environments significantly over the last ten thousand years and the contributors assess the impact of these changes on the nature of human settlement and subsistence An overview of coastal archaeology as a developing discipline is followed by ten case studies from a wide variety of places including Scandinavia Japan Tasmania and New Zealand Peru South Africa and the United States **Nyae Nyae !Kung Beliefs and**

Rites Lorna Marshall, 1999 Marshall leads the reader through the intricacies ambiguities and silences of Kung beliefs Based on fieldwork among the Bushmen of the Kalahari in the early 1950s she presents the culture beliefs and spirituality of one of the last true hunting and gathering peoples by focusing on members of different bands as they reveal their own views

The Lifeways of Hunter-Gatherers Robert L. Kelly, 2013-04-15 Challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity

The Origins And Spread Of Agriculture And Pastoralism In Eurasia David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization

The Pleistocene Old World Olga Soffer, 2013-11-11 Regional approaches to past human adaptations have generated much new knowledge and understanding Researchers working on problems of adaptations in the Holocene from those of simple hunter gatherers to those of complex sociopolitical entities like the state have found this approach suitable for comprehension of both ecological and social aspects of human behavior This research focus has however until recently left virtually untouched a major spatial and temporal segment of prehistory the Old World during the Pleistocene Extant literature on this period by and large presents either detailed site specific accounts or offers continental or even global syntheses that tend to compile site specific information but do not integrate it into whole constructs of functioning sociocultural entities This volume presents our current state of knowledge about a variety of regional adaptations that characterized prehistoric groups in the Old World before 10 000 B P The authors of the chapters consider the behavior of humans rather than that of objects or features and present data and models for various aspects of past cultures and for culture change These presentations integrate findings and understandings derived from a number of related disciplines

actively involved in researching the past Data and interpretations are offered on a range of Old world regions during the Paleolithic including Africa Asia Australia and Europe and chronological coverage spans from the Early to Late Pleistocene
