**Viduranga Y. Waisundara**

## **Patra 2016:**

Processing and Characterization of Materials Snehanshu Pal, Debdas Roy, Sudip Kumar Sinha, 2021-09-01 This book includes selected conference proceedings of Conference on Processing and Characterization of Materials CPCOM 2020 The content of the book includes processing of and characterization of materials sustainable energy materials defense materials functionally graded materials and composites which has significant impact on cutting edge applications The book also includes surface engineering computational methods and materials waste utilization and corrosion and environmental degradation of materials Design research and development studies experimental investigations theoretical analysis and fabrication techniques relevant to the application of materials in various assemblies ranging from individual components to complete structure are presented in the book The book is useful for graduate students researchers and industry professionals alike

*Geohazards* Madhavi Latha Gali, P. Raghuvir Rao, 2020-08-13 This volume comprises select papers presented during the Indian Geotechnical Conference 2018 This volume discusses concepts of soil dynamics and studies related to earthquake geotechnical engineering slope stability and landslides The papers presented in this volume analyze failures connected to geotechnical and geological origins to improve professional practice codes of analysis and design This volume will prove useful to researchers and practitioners alike

**Traditional Herbal Remedies of Sri Lanka** Viduranga Y. Waisundara, 2019-04-01 The Sri Lankan medicinal system predominantly utilizes herbs and spices for the treatment of various ailments This is mostly because Sri Lanka is a tropical country a biodiverse hot spot blessed with a plethora of flora and fauna Traditional Herbal Remedies of Sri Lanka looks at the traditional medicinal practices of the country that utilize plant material from a cultural philosophical and scientific perspective When it comes to the scientific aspects several Sri Lankan herbs have been in the spotlight for possessing bioactive constituents with promising therapeutic effects It is hoped that these will be considered as strong candidates to combat currently prevailing global disease conditions Key Features Reveals the science behind the traditional wisdom passed down in Sri Lanka's long history of using herbal medicines Emphasizes the increasing global interest in botanical drugs Reviews the hot topic of Sri Lankan herbs which possess bioactive constituents and have promising therapeutic effects Aids the international natural product communities to better understand the herbal resources in Sri Lanka

*Nanostructures for the Engineering of Cells, Tissues and Organs* Alexandru Mihai Grumezescu, 2018-02-14 Nanostructures for the Engineering of Cells Tissues and Organs showcases recent advances in pharmaceutical nanotechnology with particular emphasis on tissue engineering organ and cell applications The book provides an up to date overview of organ targeting and cell targeting using nanotechnology In addition tissue engineering applications such as skin regeneration are also discussed Written by a diverse range of international academics this book is a valuable research resource for researchers working in the biomaterials medical and pharmaceutical industries Explains how nanomaterials regulate different cell behavior and function as a carrier for different biomolecules Shows how

nanobiomaterials and nanobiodevices are used in a range of treatment areas such as skin tissue wound healing and bone regeneration Discusses nanomaterial preparation strategies for pharmaceutical application and regenerative medicine

*Traditional Herbal Therapy for the Human Immune System* Azamal Husen, 2021-10-28 Drawing on indigenous and scientific knowledge of medicinal plants *Traditional Herbal Therapy for the Human Immune System* presents the protective and therapeutic potential of plant based drinks supplements nutraceuticals synergy food superfoods and other products Medicinal plants and their products can affect the immune system and act as immunomodulators Medicinal plants are popularly used in folk medicine to accelerate the human immune defence and improve body reactions against infectious or exogenous injuries as well as to suppress the abnormal immune response occurring in immune disorders This book explains how medicinal plants can act as a source of vitamins and improve body functions such as enhanced oxygen circulation maintained blood pressure and improved mood It also outlines how specific properties of certain plants can help boost the immune system of humans with cancer HIV and COVID 19 Key features Provides specific information on how to accelerate and or fortify the human immune system by using medicinal plants Presents scientific understanding of herbs shrubs climbers and trees and their potential uses in conventional and herbal medicine systems Discusses the specific role of herbal plants that act as antiviral and antibacterial agents and offer boosted immunity for cancer H1N1 virus relieving swine flu HIV and COVID 19 patients Part of the *Exploring Medicinal Plants* series this book is useful for researchers and students as well as policy makers and people working in industry who have an interest in plant derived medications

*Green Adsorbents for Pollutant Removal* Grégorio Crini, Eric Lichtfouse, 2018-06-27 This is the first volume on adsorption using green adsorbents and is written by international contributors who are the leading experts in the adsorption field The first volume provides an overview of fundamentals and design of adsorption processes For people who are new to the field the book starts by two overview chapters presenting the principles and properties of wastewater treatment and adsorption processes The book also provides a comprehensive source of knowledge on acid base properties of biosorbents It discusses fractal like kinetic models for fluid solid adsorption reports on the chemical characterization of oxidized activated carbons for metal removal and the use of magnetic biosorbents in water treatment Furthermore the thermodynamic properties of metals adsorption by green adsorbents and biosorption of polycyclic aromatic hydrocarbons and organic pollutants are reviewed and finally the recent trends and impact of nanomaterials as green adsorbent and potential catalysts for environmental applications are summarized The audience for this book includes students environmentalists engineers water scientists civil and industrial personnel who wish to specialize in adsorption technology Academically this book will be of use to students in chemical and environmental engineering who wish to learn about adsorption and its fundamentals It has also been compiled for practicing engineers who wish to know about recent developments on adsorbent materials in order to promote further research toward improving and developing newer adsorbents and processes for the efficient removal of pollutants from industrial effluents It

is hoped that the book will serve as a readable and useful presentation not only for undergraduate and postgraduate students but also for the water scientists and engineers and as a convenient reference handbook in the form of numerous recent examples and appended information *Ethnobotany, Volume 1* Dr. Suresh Kumar, 2018-07-02 Ethnobotany deals with relationship between people and plants Since ancient times plants were used to cure all types of illness and diseases all over the world The traditional knowledge of medicinal valued plants communicated from one generation to another generation and plays a significant role in the development of traditional medicines The ethnobotanical research provides information about medicinal plants that can cure fatal diseases This book has fourteen chapters that include various aspect of Ethnobotany viz Introduction to Ethnobotany Ethnobotany Past Present and Future Ethnobotany and Ayurveda Important Sacred Plants in India Grace of Butter tree Diversity Indigenous use of the Ethnomedicinal flora of various plants of India Ethnobotany and Modern system of Medicine Plants of folklore from myth to magic Different tribal committee of India and Historical journey and its prospective in India This book is highly relevant to innovated and enhance knowledge about Ethnobotany and helpful for undergraduate post graduate students research scholars and faculty The book incorporates chapters authored by eminent botanists who are working in the field of Ethnobotany since a long time **Sustainable Management of Mining Waste and Tailings** Alok Prasad Das, Eric D. van Hullebusch, Ata Akçil, 2024-06-25 Integrating waste management environmental sustainability and economic development is a prime milestone in the circular economy Critical metals recovery from mining tailings and secondary resources has significant potential with widespread applications in high tech industries that are critical to modern society and sustainable development This book discusses technological advances for managing industrial and mining waste through circular economy approaches and successful critical metal recovery from secondary resources It highlights how reprocessing of mine waste and tailings results in development of critical raw materials that significantly reduce the mining burden and ensure the lucrative use of waste materials Features Describes advances in remediation and valorization technologies for mining wastes Details biotechnological methods cutting edge research and applications Covers use of waste mining resources for economic growth and novel opportunities Discusses IR4 0 and machine learning methods Includes reports and case studies on mining waste in value added products and recovery of strategically important critical minerals This book will be of value to researchers and advanced students working in the mining chemical and environmental engineering and renewable energy sectors *Hazardous and Trace Materials in Soil and Plants* M. Naeem, Tariq Aftab, Abid Ali Ansari, Sarvajeet Singh Gill, Anca Macovei, 2022-08-13 Hazardous and Trace Materials in Soil and Plants Sources Effects and Management explores the latest advancements in reducing avoiding and eliminating soil contaminants that challenge the health and safety of agricultural plants With a focus on minimizing the production of those hazardous substances controlling their distribution and ensuring safe utilization the book explores each contributing area and provides insights toward improved sustainable and secure production This is an excellent reference

resource on both current research and future directions from laboratory research to field applications The combined impacts of climate change and industrialization have led to increased and diversified threats to the health of the soil in which our food crops are grown as well as in the plants themselves This dual hazard scenario is increasingly recognized as a threat to not just the environment but to global food security as agricultural soils contaminated with pollutants alter plant metabolism thus resulting in reduced crop quality and production quantity Addresses the challenges of mitigating toxic substances in plants including agricultural crops Presents current status and future prospects for managing biotic and abiotic environmental stress factors through plant stress tolerance mechanisms Includes chapters that address both biotic and abiotic stresses agricultural and environmental science toxicology biotechnology nanotechnology and molecular studies Integrates insights and developments between environmental and plant science

The Palgrave Handbook of Socio-ecological Resilience in the Face of Climate Change Sunil Nautiyal, Anil Kumar Gupta, Mrinalini Goswami, Y. D. Imran Khan, 2023-09-01 This book shares experiences and knowledge on climate change impacts and adaptation risk reduction strategies communities responses and best practices from different landscapes of India It provides insights into climate change risk reduction in trans disciplinary frameworks The findings and discussions put forward in the chapters largely based on micro level case studies provide an in depth understanding of interactions among ecology society and economy under different conditions of changing climate It contains critical discussion on both existing and required actions as adjustments to climate change impacts by different actors at diverse scales and contexts The recommendations will be beneficial in climate change adaptation planning for India and other developing countries where a large portion of the population directly depends on climate sensitive sectors The content of the book is interdisciplinary and it will be beneficial for scholars and practitioners from natural science social science policy and governance across the continents

*India Population Report* K. S. James, T. V. Sekher, 2024-06-27 Studies various aspects of population in India providing a holistic narrative of the current scenario and future implications

*Research and Technological Advances in Food Science* Bhanu Prakash, 2021-11-30 The reduction in nutritional quality of food due to microbial contamination is a problem faced by much of the developing world To address contamination related hunger and malnutrition it is crucial to enforce quantitative and qualitative protection of agri food commodities after harvesting as well as to create low cost rational strategies to protect post harvest losses and nutritional properties of food products in a sustainable manner Research and Technological Advances in Food Science provides readers with a systematic and in depth understanding of basic and advanced concepts in food science and post harvest technology including the most up to date information about different natural food source sources of microbial plant and animal origin and their health benefits It also highlights current research and technological advances in food science related to health such as personalized food and nutrition seafood nutraceuticals meat processing and product development microbial enzymes for the tenderization of meat feruloylated oligosaccharides for human health and the role of microbial antagonistic in post harvest management of

fruit In addition the book explores the role of modern tools and techniques such as instrumentation nanotechnology biotechnology ultrasound in food processing and food omics in food science Research and Technological Advances in Food Science is an excellent resource for researchers food scientists biochemists pharmacologists nutritionists policymakers and students working in the food science domain Includes information about different natural sources of food microbes plants and animal origin and their health benefits Highlights current research and technological advances in food science related to health Brings the role of microbial antagonistic plant volatiles and technological advances in the post harvest management of food commodities *Environmental Nexus Approach* Sartaj Ahmad Bhat,Vineet Kumar,Fusheng Li,Fuad Ameen,Sunil Kumar,2024-08-29 *Environmental Nexus Approach* Management of Water Waste and Soil establishes linkages between environmental resources such as water waste and soil in order to facilitate sustainable management of these resources It shows the nexus approach as a policy relevant means of environmental management by focusing on integrated management of water waste and soil resources It synthesizes interdisciplinary theory concepts definitions models and findings involved in complex global sustainability problem solving making it an essential guide and reference It includes real world examples and applications making the book accessible to a broader interdisciplinary readership Features Explores cutting edge developments in the environmental nexus approach of water waste and soil Introduces the key mechanisms regarding antibiotic resistance genes microplastics and other emerging contaminants in the water waste and soil nexus Investigates the fate and behavior of heavy metals polyaromatic hydrocarbons plastics and pesticides in soil systems and their risk assessment Provides insights into the latest developments current research perspectives technology development critical thinking and societal requirements of the environmental nexus between water waste and soil This book is aimed at graduate students and researchers in environmental science and engineering environmental engineering and waste management

Handbook of Research on Advancements in Cancer Therapeutics Kumar, Sumit,Rizvi, Moshahid Alam,Verma, Saurabh,2020-11-27 The complexity of cancer demands an integrated approach from both a cancer biology standpoint and a pharmaceutical basis to understand the different anticancer modalities Current research has been focused on conventional and newer anticancer modalities recent discoveries in cancer research and also the advancements in cancer treatment There is a current need for more research on the advances in cancer therapeutics that bridge the gap between basic research pharmaceutical drug development processes regulatory issues and translational experimentation and clinical application Recent promising discoveries such as immunotherapies promising therapies undergoing clinical trials synthetic lethality carbon beam radiation and other exciting targeted therapies are being studied to improve and advance the studies of modern cancer treatment The Handbook of Research on Advancements in Cancer Therapeutics serves as a comprehensive guide in modern cancer treatment by combining and merging the knowledge from both cancer biology and the pharmacology of anticancer modalities The chapters come from multi disciplinary backgrounds including scientists and clinicians from both

academia and various industries to discuss nascent personalized therapies and big data driven cancer treatment While highlighting topic areas that include cancer prevention cancer therapeutics and cancer treatments through the lenses of technology medicine drugs and alternate therapies this book is ideally intended for oncologists radiation oncologists surgical oncologists and cancer biologists along with practitioners stakeholders researchers academicians and students who are interested in understanding the most fundamental aspects of cancer and the available therapeutic opportunities *Higher Education and Intellectual Retrogression* Arup Maharatna,2023-02-24 This monograph critically analyses the historical evolution of ideas perceptions and principles on higher education and unravels a few of its interlinked aspects content quality standard massification privatization and commercialization It presents both original and penetrative critique of neoliberal ideas and policies reigning higher education since World War II The volume argues that with the proliferation of academic capitalism the academic quality of higher education has been inevitably compromised and it has thereby heralded a comprehensive intellectual retrogression The book offers a meticulous evaluation of global research reflecting on impeccable evidence of decline in academic learning in its effort quality standards and overall intellectual level and rigour Finally it illuminates why it is dangerous to continue clinging ideationally to neoliberal reign in education and thereby evading or effacing some of the lasting and universal wisdoms and precepts of the educational reign preceding neoliberal marketoriented predominancy The book will be of interest to students teachers and researchers of education higher education sociology of education economics and politics of education It will also be useful for academicians higher education administration policymakers schoolteachers and those interested in debates and issues around higher education *Ethnic Knowledge and Perspectives of Medicinal Plants* Münir Öztürk,Kandikre Ramaiah Sridhar,Maryam Sarwat,Volkan Altay,Francisco Martín Huerta-Martínez,2023-10-20 This new 2 volume set aims to share and preserve ethnic and traditional knowledge of herbal medicine and treatments while also emphasizing the link between biodiversity human nutrition and food security *Ethnic Knowledge and Perspectives of Medicinal Plants* is divided into two volumes with volume 1 focusing on the traditional use of curative properties and treatment strategies of medicinal plants and volume 2 addressing the varied nutritional and dietary benefits of medicinal plants and the practice of Ayurveda Both volumes stress the importance of bioresources for human nutrition and nutraceuticals based on ethnic knowledge and the need for efforts to protect biodiversity in many regions rich with medicinal plants Exploring the benefits of medicinal plants in disease prevention treatment and management Volume 1 discusses the traditional use of medicinal plants as promising therapeutics for cancer liver conditions COVID 19 and other human ailments It examines the efficacy of Ayurvedic and Chinese herbal medicine Indian traditional medicine and other ethnic herbal practices used by indigenous peoples of Azerbaijan South America Turkey India etc A variety of plants are discussed and the ethnomedicinal applications of over 100 wild mushrooms for their medicinal and healthcare purposes are elaborated on While volume 1 focuses primarily on natural plant resources for

addressing specific health issues volume 2 looks at traditional medicinal plant use for their nutritional and dietary benefits while also encouraging the preservation of biodiversity for healthy and sustainable diets The volume presents information on over 2200 vascular plant taxa from 127 families as well as many taxa from leaf parts fruits underground parts floral parts seeds and more that have potential use as edible food plants Ethnic knowledge on the wild edible mushrooms is an emerging area which is unique and is dependent on the folk knowledge of tribals this volume discusses the unique nutritional attributes of wild edible mushrooms 206 species belonging to 73 genera in Southern India The authors look at various lichens as nutritional aids and medicine and as flavoring agents and spices Fucoidans derived from the seaweeds and spirulina are described for their antioxidant activity nutritional and anti aging properties antiviral activities anti cancer properties anti diabetic properties and more The authors also examine how ethnicity affects healthcare nutritive systems at different levels through various dynamics such as lower income inability for services uptake disputes among different ethnic groups cultural attitudes some ethnic group are vegetarian lack of socio economic resources and disease prevalence Together these two important volumes aim to preserve and disseminate the valuable ethnic knowledge of medicinal plants gained over thousands of years and to promote the value of integrating and safeguarding biodiversity

Corporate Social Responsibility and Economic Responsiveness in India Damien Krichewsky, 2019-05-23 Provides detailed analyses of CSR in the cement industry and in regulatory policies adopted by the central government in India

**Rhizosphere Engineering** Ramesh Chandra Dubey, Pankaj Kumar, 2022-02-15 Rhizosphere Engineering is a guide to applying environmentally sound agronomic practices to improve crop yield while also protecting soil resources Focusing on the potential and positive impacts of appropriate practices the book includes the use of beneficial microbes nanotechnology and metagenomics Developing and applying techniques that not only enhance yield but also restore the quality of soil and water using beneficial microbes such as Bacillus Pseudomonas vesicular arbuscular mycorrhiza VAM fungi and others are covered along with new information on utilizing nanotechnology quorum sensing and other technologies to further advance the science Designed to fill the gap between research and application this book is written for advanced students researchers and those seeking real world insights for improving agricultural production Explores the potential benefits of optimized rhizosphere Includes metagenomics and their emerging importance Presents insights into the use of biosurfactants

*Marginalised Groups in India* Kunal Debnath, Souvik Chatterjee, 2024-11-18 This book intersects marginality politics and policies by focusing on the narratives of selective marginalised groups within India Encouraging inclusive government policies that consider the diverse identities of individuals and groups within India this book is a systematic documentation of the lived experiences of various marginalised collectives such as the Naths of Bengal the De notified Tribes of Maharashtra the Kukis of Manipur and the beggars The chapters use historiography as a method to understand narratives of marginality in India illuminating how power imbalances in Indian society lead to the marginalisation of specific groups depriving them of fundamental rights and
