Art of Illusion Dan Karlholm, 2006 To survey art history as a whole was a pressing task for a generation of German scholars around the mid nineteenth century Their projections of a historicist chain of artworks ranged from textual narratives without illustrations to separate picture compendia as well as images of a more allegorical kind Other means with which to picture art history as part of a virtually all encompassing cultural history were the museums of art erected in Germany at the time in Berlin and Munich especially This book deals with practices of representing art history in various media This includes post Hegelian texts and engravings of art history from the 1840s onwards by Franz Kugler Julius Schnorr and others In addition works of art of the late twentieth century by Andy Warhol Anselm Kiefer and others provide opportunities to speculate on the after effects and discursive traces of the old regime Extending the concept of historiography to include not just textual or institutional endeavours but a host of different images as well from reproductive prints to pop paintings and visual archives of the digital era this study is intended to contribute in new ways to a critical historiography of the field of art history and visual culture today

Artworks Robert Stecker, 1996-12-09 What is art What is it to understand a work of art What is the value of art Robert Stecker seeks to answer these central questions of aesthetics by placing them within the context of an ongoing debate criticizing but also explaining what can be learned from alternative views His unified philosophy of art defined in terms of its evolving functions is used to explain and to justify current interpretive practices and to motivate an investigation of artistic value Stecker defines art roughly as an item that is an artwork at time t if and only if it is in one of the central art forms at t and is intended to fulfill a function art has at t or it is an artifact that achieves excellence in fulfilling such a function Further he sees the standard of acceptability for interpretations of artworks to be relative to their aim Finally he tries to understand the value of artworks through an analysis of literature and the identification of the most important functions of literary works In addition to offering original answers to major questions of aesthetics Artworks covers most of the major issues in contemporary analytic aesthetics and discusses many major as well as many minor figures who have written about these issues including Stanley Fish Joseph Margolis Richard Rorty and Richard Shusterman

[A Forest of Symbols](#) Andrei Pop,2019-10-18 In this groundbreaking book Andrei Pop presents a lucid reassessment of those writers and artists in the late nineteenth century whose work merits the adjective symbolist For Pop this term denotes an art that is self conscious about its modes of making meaning and he argues that these symbolist practices which sought to provide more direct access to the viewer by constant revision of its material means of meaning making brushstrokes on a canvas words on a page are crucial to understanding the genesis of modern art The symbolists saw art not as a social revolution but a revolution in sense and in how we conceptualize the world At the same time the concerns of symbolist painters and poets were shared to a remarkable degree by theoretical scientists of the period especially by mathematicians and logicians who were dissatisfied with the strict empiricism dominant in their disciplines and which made shared knowledge seem unattainable A crisis of sense made art and science look for conceptual foundations underlying the diverging subjective responses and perceptions of individuals Unlike other studies of this period Pop s focus is not on how individual artists may have absorbed bits of scientific theories but rather on the philosophical questions that were relevant to both domains The problem of subjectivity in particular of what in one s experience can and cannot be shared was crucial to the possibility of collaboration within science and to the communication of artistic innovation Pop s brilliant close readings of the literary and visual practices of Manet and Mallarm of drawings by Ernst Mach William James and Wittgenstein of experiments with color by Bracquemond and Van Gogh and of the philosophical systems of Frege and Russell add up to a startling but coherent picture of the symbolist heritage of modernity and its consequences

[A Realist Theory of Art History](#) Ian Verstegen,2013-01-03 As the theoretical alignments within academia shift this book introduces a surprising variety of realism to abolish the old positivist theory dichotomy that has haunted Art History Demanding frankly the referential detachment of the objects under study the book proposes a stratified multi causal account of art history that addresses postmodern concerns while saving it from its errors of self refutation

Building from the very basic distinction between intransitive being and transitive knowing objects can be affirmed as real while our knowledge of them is held to be fallible Several focused chapters address basic problems while introducing philosophical reflection into art history These include basic ontological distinctions between society and culture general and special history the discontinuity of cultural objects the importance of definition for special history scales facets and fiat objects as forms of historical structure the nature of evidence and proof historical truth and controversies Stressing Critical Realism as the stratified multi causal approach needed for productive research today in the academy this book creates the subject of the ontology of art history and sets aside a theoretical space for metaphysical reflection thus clarifying the usually muddy distinction between theory methodology and historiography in art history
