Observing Children in Their Natural Worlds Anthony D. Pellegrini, Frank Symons, John Hoch, 2014-04-08 This second edition updates the methods based on new technologies updates and increases the number of examples and reorganizes so the theoretical material is up front The author s decisions were guided by having used the first edition in classes at two universities Consequently he received feedback on the book from a variety of different perspectives from groups of very conscientious and competent students and from colleagues around the world who have used the book By consensus the most popular aspect of the first edition was the organization of the book where the student researcher is guided through conceptualizing designing implementing and writing up the research project This basic organization is the same as in the first edition however within this organizational frame things have changed The discussion of the place of direct observational methods in relation to different qualitative and quantitative research traditions has been kept but expanded Discussions of the use of direct observations in naturalistic settings drawing from research methods in ethology and ethnography and in more contrived settings drawing from experimental psychology are extended Relatedly an extended discussion has been added on theories of science guiding different research assumptions In addition sections of validity reliability and the ethics surrounding the research enterprise are also expanded These constructs are not specific to observational methods but relevant to the general research process In revised chapters in these areas the author provides

grounding in the general concepts and then draws more specific focus to observational methods The extended discussion of ethics is important since issues related to who gets authorship on papers how to complete Institutional Review Board forms and honesty in reporting findings are all issues that face both junior and senior researchers alike Practical issues of writing research papers are expanded in this edition providing discussions of writing both review and empirical articles Lastly a new and extensive chapter on using technology in direct observational methods has been added which reviews the available hardware and software in direct observational methods
