cognitive behavioral approaches particularly mindfulness compassion and acceptance based approaches can contribute to
the design of more efficacious parenting interventions and to a better understanding of parenting behaviors and the parent
child relationship However the application of third generation cognitive behavioral therapies and concepts to parenting is
still in its infancy and further research is needed to explore the potential of these approaches to enhance existing parenting
interventions or to inform the development of new parenting interventions targeting different groups of parents and their
children More research is also needed to understand how mindfulness self compassion acceptance and other related
psychological processes may influence parenting practices the parent child relationship and the child s socioemotional
development With this e book presenting state of the art research articles on third generation cognitive behavioral
approaches a new step is taken in 1 exploring relations between parenting related issues and concepts from the third
