Singh, Nurul-Syakima Ab Mutalib, Marta López, 2020-12-11 A question raised by many individuals today How Safe is Our Food Consumed Today Food safety has become a hot topic and an important public issue due to the increasingly widespread nature of foodborne illnesses in both developed and developing countries As food is biological in nature and supplies

consumers with nutrients it is also equally capable of supporting the growth of microorganisms from the environmental sources A precise method of monitoring and detecting of foodborne pathogens including Salmonella sp Vibrio sp Listeria monocytogenes Campylobacter and Norovirus is needed to prevent and control human foodborne infections Clinical treatments of infection caused by foodborne pathogens are becoming tougher with the increase number of multidrug resistant pathogens in the environment This situation creates a huge healthcare burden e g prolonged treatment for infections decrease in the efficacy of antibiotic delay in treatment due to unavailability of new antibiotics and increased number of deaths As such continuous investigation of the foodborne pathogens is needed to pave the way for a deeper understanding on the foodborne diseases and to improve disease prevention management and treatments Occurrence of Manganese in Drinking Water and Manganese Control Paul M.
