Martínez-López, 2020-06-28 This is the fourth edition of a unique textbook that provides extensive coverage of the evolution the current state and the practice of e business strategies It provides a solid introduction to understanding e business and e commerce by combining fundamental concepts and application models with practice based case studies An ideal classroom companion for business schools the authors use their extensive knowledge to show how corporate strategy can imbibe and thrive by adopting vibrant e business frameworks with proper tools Students will gain a thorough knowledge of developing electronic and mobile commerce strategies and the methods to deal with these issues and challenges      Sustainability Challenges and Solutions at the Base of the Pyramid Prabhu Kandachar, Minna Halme, 2017-09-08 Around the turn of the millennium it had become painfully evident that development aid charity or global business as usual were not going to be the mechanisms to alleviate global poverty Today there is little dispute that poverty remains the most pressing global problem calling for innovative solutions One recent strategy is the Base of the Pyramid BoP concept developed by Prahalad and Hart which relies on

entrepreneurial activity tapping into the previously ignored markets of the economically most disadvantaged. It is a process requiring innovations in several disciplines: technological, social, and business. This book covers a number of areas. First, much of the current BoP discussion emphasises targeting products to the needs of the poor. But do we actually know what the real needs of the poor are? This book takes a bottom-up, human-centred approach and examines examples that truly engage the poor in BoP product and service development. What types of needs assessment methodologies are indicated, considering the cultural differences in BoP countries? Are the existing methodologies adequate? Do they need to be redefined and redeveloped? Second, the book considers how we can balance poverty alleviation and stimulate economic growth without stressing the ecosystem. Tragically, the poor are hardest hit by the adverse effects of environmental deterioration such as water shortages, climate change, or the destruction of habitats. While the economic welfare of the poor is critical, the BoP approach must balance its inherent paradox of encouraging greater consumption while avoiding further pressures on environmental sustainability. The link between the BoP approach and sustainable development is a key feature of this book. Third, it looks at innovation and asks what kinds of bottom-up innovation, open source, technological, social, and business support BoP initiatives and sustainable development. Fourth, the book deals with the relationship between development assistance and BoP. Is a BoP strategy the antithesis to development aid, or can these two co-exist or even complement each other? Finally, the book raises questions about the relationship between corporate responsibility and BoP. Is BoP a new form of corporate neo-colonialism, or a new form of corporate responsibility? Although the BoP concept has unleashed an extensive and generally enthusiastic response from academics, businesses, NGOs, and governments, the knowledge domain around this concept is still in the early stages of development. This book addresses that need with a focus on the needs of the end users, the poor, as a starting point for BoP products and innovations. With contributions from both supporters and critics, it provides a treasure trove of global knowledge on how the concept has developed, what its successes and failures have been, and what promise it holds as a long-term strategy for alleviating poverty and tackling global sustainability. Choice, 2001 *Intelligent Energy Field Manufacturing* Wenwu Zhang, 2018-10-03. Edited by prominent researchers and with contributions from experts in their individual areas, *Intelligent Energy Field Manufacturing: Interdisciplinary Process Innovations* explores a new philosophy of engineering. An in-depth introduction to Intelligent Energy Field Manufacturing (EFM), this book explores a fresh engineering methodology that not only integrates but goes beyond methodologies such as Design for Six Sigma, Lean Manufacturing, Concurrent Engineering, TRIZ, green, and sustainable manufacturing, and more. This book gives a systematic introduction to classic non-mechanical manufacturing processes as well as offering big pictures of some technical frontiers in modern engineering. The book suggests that any manufacturing process is actually a process of injecting human intelligence into the interaction between material and the various energy fields in order to transfer the material into desired configurations. It discusses technological innovation, dynamic M-PiE flows, the generalities of energy fields, logic, functional materials, and

intelligence the open scheme of intelligent EFM implementation and the principles of intelligent EFM The book takes a highly interdisciplinary approach that includes research frontiers such as micro nano fabrication high strain rate processes laser shock forming materials science and engineering bioengineering etc in addition to a detailed treatment of the so called non traditional manufacturing processes which covers waterjet machining laser material processing ultrasonic material processing EDM ECM etc Filled with illustrative pictures figures and tables that make technical materials more absorbable the book cuts across multiple engineering disciplines The majority of books in this area report the facts of proven knowledge while the behind the scenes thinking is usually neglected This book examines the big picture of manufacturing in depth before diving into the details
