Passion And Craft Economists At Work:

Passion and Craft Michael Szenberg, 1998 Autobiographical essays from twenty top economists at mid career

Distinguished Women Economists Julianne Cicarelli, 2003-10-30 Women are vital members of the economics profession yet they have traditionally received scant recognition for their work This volume provides information on 51 remarkable women in the profession They come from all areas of economics academia the business world public policy and include those who are currently active as well as 19th century pioneers in the field Entries cover biographical information as well as the subjects work providing a unique guide to the many and varied contributions these women have made to economics Joan Robinson was one of the most significant economists of the 20th century Juanita Morris Kreps was Secretary of Commerce under Jimmy Carter And forecasting guru Abbey Joseph Cohen appears regularly on PBS CNN and CNBC Women are vital members of the economics profession yet they have traditionally received scant recognition for their work This volume provides information on 51 remarkable women in the profession They come from all areas of economics academia the business world public policy and include those who are currently active as well as 19th century pioneers in the field Entries cover biographical information as well as the subjects work providing a unique guide to the many and varied contributions these women have made to economics Seeking to provide balanced coverage this book covers accomplished and emerging economists living and deceased individuals and women from all philosophical perspectives and economic areas Some have worked in several areas Kathleen Bell Cooper for instance was Chief Economist at Exxon Corporation and is now Under Secretary of Commerce for Economic Affairs while Marina Whitman now with the University of Michigan Business School was a senior executive with General Motors and the first woman appointed to the President s Council of Economic Advisors Others have spent their career in academia All have been prolific writers as their entries document and all made their mark on economics This book is a testament to their achievements *Regional Economic Change in Europe* Gert-Jan Hospers, 2004 In this era of ongoing globalization a coherent vision on Europe s changing geo economy is more important than ever before Drawing on the work of Schumpeter Fourasti e and Perroux the book at hand offers a new and policy oriented perspective on regional economic change in Europe Conceptually it develops a middle range theory by extending Schumpeter s vision with a sectoral and spatial dimension This neo Schumpeterian framework is concretized by exploring fifty years of structural change in Sardinia the Ruhrgebiet and the resund The SAGE Handbook of the Philosophy of Social Sciences Ian C Jarvie, Jesus Zamora-Bonilla, 2011-03-14 In this exciting Handbook Ian Jarvie and Jes s Zamora Bonilla have put together a wide ranging and authoritative overview of the main philosophical currents and traditions at work in the social sciences today Starting with the history of social scientific thought this Handbook sets out to explore that core fundamentals of social science practice from issues of ontology and epistemology to issues of practical method Along the way it investigates such notions as paradigm empiricism postmodernism naturalism language agency power culture and causality

Prediction or Prophecy? Gregor Betz, 2007-10-06 Knowing in order to predict It was this leitmotiv alone that Auguste Comte in the 19th century considered suitable for the then rapidly developing empirical sciences This view remains unchanged until today not only in the empirical sciences themselves but also in the philosophy of science A scientific theory is and should be evaluated primarily on the grounds of its capacity to correctly predict observable phenomena The aim of predicting takes precedence over the other important aim of science namely to produce and purposefully manipulate phenomena by technical means in the laboratory moreover it even includes the latter For if scientists successfully produce and manipulate certain phenomena in an experiment they can ipso facto predict how that experiment will evolve under certain conditions We live in a scientifically dominated world The more science progresses the more important correct scientific predictions become To a sometimes even fatal extent we have made ourselves dependent on science and its results Our scientific technological interventions into nature yet also into social processes cover ever larger spatial and temporal distances and the consequences are ever more drastic given the increasing effort that would be required to reverse the effects if that is possible at all That is the reason why we ought to be very well informed about the consequences of our actions in particular those based on science and technology

Law and Economics Alain Marciano, 2013-09-13 This book brings together the most authoritative articles on Law and Economics and

the interaction between the two disciplines as well as the use of economic tools to analyse legal problems Aimed at students experiencing the subject for the first time the selections are interlaced with a wealth of features including explanatory introductions and exercises Key features of the reader include The accessibility of the material the articles should be understandable to those with only a limited background in economics and law The book s focus on the most important and basic foundational issues in law and economics An exposition of the opposition between the different legal systems that exist in the world including common law civil law and public law Debates viewed from the perspective of the scholars from a range of backgrounds are presented as well as all the key figures in economics and in law The book should prove to be an essential resource to all students studying this burgeoning field and represents an exciting introduction to one of the key disciplines which has grown up in the social sciences in recent times *Complex Adaptive Systems* John H. Miller, Scott E.

Page, 2009-11-28 This book provides the first clear comprehensive and accessible account of complex adaptive social systems by two of the field s leading authorities Such systems whether political parties stock markets or ant colonies present some of the most intriguing theoretical and practical challenges confronting the social sciences Engagingly written and balancing technical detail with intuitive explanations *Complex Adaptive Systems* focuses on the key tools and ideas that have emerged in the field since the mid 1990s as well as the techniques needed to investigate such systems It provides a detailed introduction to concepts such as emergence self organized criticality automata networks diversity adaptation and feedback It also demonstrates how complex adaptive systems can be explored using methods ranging from mathematics to computational models of adaptive agents John Miller and Scott Page show how to combine ideas from economics political science biology physics and computer science to illuminate topics in organization adaptation decentralization and robustness They also demonstrate how the usual extremes used in modeling can be fruitfully transcended *An Economic Analysis of*

the University Jutta Merschen, 2012-02-13 During the last few years the German higher education landscape has witnessed an increase in the delegation of decision power from the state to the universities In order to adapt to this new situation universities are more and more looking at management structures decision making systems and governance mechanisms as fundamental performance drivers The objective of this dissertation is to provide an economic insight into the inner workings of universities in Germany thus answering the question of how they should organize themselves in order to persist in times of economic organizational and competitive challenges Special focus lies on the analysis of the role of faculty in participative university decision making and its positive and negative effects on the university Based on theoretical and empirical analysis the dissertation outlines policy recommendations that may help to overcome the problems inherent in today s university management and governance structures in Germany *The Human Society and the Internet: Internet Related*

Socio-Economic Issues Won Kim, Tok-Wang Ling, Yoon-Joon Lee, Seung-Soo Park, 2003-06-29 During the past several years the world has entered the first phase of the Internet Revolution Investors showed confidence and faith in the prospects of the

Internet driven economy In the US alone some 30 000 dot com companies have sprung up to support electronic commerce with a wide variety of business models technologies and or items or services to sell or even give away Traditional businesses so called brick and mortar or offline businesses have started to respond to challenges by Internet based new competitors by augmenting their own businesses with Internet based or online businesses and or filing lawsuits against them The initial business to consumer orientation of electronic commerce is giving way to business to business commerce with large corporations forming electronic exchanges or consortia to conduct commerce among members Government industry and civic groups have started addressing social issues related to the Internet such as taxation on electronic commerce privacy intellectual property rights security hacking cyber crimes digital divide etc Governments have started legitimizing electronic signatures and stepping up efforts to track down perpetrators of cyber crimes The courts have started to wrestle with issues of privacy intellectual property rights crimes and impediments to Internet driven economy

Foundations of Quantization for Probability Distributions Siegfried Graf, Harald Luschgy, 2000-05-16 Due to the rapidly increasing need for methods of data compression quantization has become a flourishing field in signal and image processing and information theory The same techniques are also used in statistics cluster analysis pattern recognition and operations research optimal location of service centers The book gives the first mathematically rigorous account of the fundamental theory underlying these applications The emphasis is on the asymptotics of quantization errors for absolutely continuous and special classes of singular probabilities surface measures self similar measures presenting some new results for the first time Written for researchers and graduate students in probability theory the monograph is of potential interest to all people working in the disciplines mentioned above

Novel Pedagogy Liwen Zhang, 2024-10-01 Is the novel a category of knowledge that merits serious study Even if the novel has shed the stigma of being mindless entertainment one might easily assume that reading a novel is not studying unless one reads closely and carefully preferably from a scholarly edition or for a scholarly purpose *Novel Pedagogy* explores how Victorian writers envisioned the novel s potential to become knowledge long before the form s ascendance into the ivory tower Liwen Zhang argues that Victorian novelists constant critique of schooling on the one hand and their frequent invocation of deep knowledge on the other are not self contradictory Instead of offering a blissful escape from education writers such as William Thackeray Charles Kingsley Charles Dickens Elizabeth Gaskell George Eliot and George Gissing seek to offer uniquely novelistic pathways to knowledge *Novel Pedagogy* offers a new model of novelistic epistemology by showing how the novel unlike other educational genres reflects on the unpleasant realities of learning and of not learning amid the ubiquity of ineffective textbooks reluctant students and false motivations
