Passions Within Reason Robert H. Frank, 1988 In looking at the behavior of the me generation the author acknowledges the occurence of selfless acts and argues that looking out for number one may require looking out for others too **Ascent of Affect** Ruth Leys, 2017-11-10 In recent years emotions have become a major vibrant topic of research not merely in the biological and psychological sciences but throughout a wide swath of the humanities and social sciences as well Yet surprisingly there is still no consensus on their basic nature or workings Ruth Leys s brilliant much anticipated history therefore is a story of controversy and disagreement The Ascent of Affect focuses on the post World War II period when interest in emotions as an object of study began to revive Leys analyzes the ongoing debate over how to understand emotions paying particular attention to the continual conflict between camps that argue for the intentionality or meaning of emotions but have trouble explaining their presence in non human animals and those that argue for the universality of emotions but struggle when the question turns to meaning Addressing the work of key figures from across the spectrum considering the potentially misleading appeal of neuroscience for those working in the humanities and bringing her story fully up to date by taking in the latest debates Leys presents here the most thorough analysis available of how we have tried to think about how Thinking about the Emotions Alix Cohen, Robert Stern, 2017-05-26 Philosophical reflection on the emotions has we feel a long history stretching back to classical Greek thought even though at times philosophers have marginalized or denigrated them in favour of reason Fourteen leading philosophers here offer a broad survey of the development of our understanding of the emotions The thinkers they discuss include Aristotle Aguinas Ockham Descartes Malebranche Spinoza Hobbes Hume Shaftesbury Hutcheson Kant Schiller Schopenhauer Nietzsche James Brentano Stumpf Scheler Heidegger and Sartre Central issues include the taxonomy of the emotions the distinction between emotions passions feelings and moods the relation between the emotions and reason the relationship between the self and the emotions At a metaphilosophical level the collection also raises issues about the value of historical study of the discipline and what light it can shed on contemporary concerns Thinking about the Emotions is a fascinating and illuminating collective study of how philosophers have grappled with this most intriguing part of our nature as beings who feel as well as think and act **Philosophy of Emotion** Christine Tappolet, 2022-11-28 In this book Christine Tappolet offers readers a thorough wide ranging and highly accessible introduction to the philosophy of emotions It covers recent interdisciplinary debates on the nature of emotions as well as standard theories of emotions such as feeling theories motivational theories and evaluative theories The book includes discussions of the alleged irrationality of emotions and looks into the question of whether emotions could not in some cases contribute positively to theoretical and practical rationality In addition the role of emotions in the theory of virtues and the theory of values receives a detailed treatment Finally the book turns to the question of how we can regulate and even educate our emotions by engaging with music and with narrative art The overall picture of emotions that emerges is one that

does justice to the central role that emotions play in our lives conceiving of emotions as crucial to our grasp of values As an opinionated introduction the book doesn't pretend to be neutral but aims to engage readers in contemporary debates Each chapter closes with questions for further discussion and suggestions for further reading Key Features Written for advanced undergraduates suitable as the main text in a philosophy of emotion course or as a complement to a set of primary readings Includes useful features for student readers like introductions study questions and suggestions for further reading in each chapter Considers whether emotions interfere with our reasoning or whether they can in some cases help us to be more rational Argues against basic emotion theory and social constructionism that emotions are both shaped by biological forces and social forces Discusses a variety of subjectivist and objectivist approaches which share the assumption that emotions and values are closely connected **Communicating Emotion** Sally Planalp, 1999-08-13 The modern world is forcing us to understand emotion in order to cope with new problems such as road rage and epidemic levels of depression as well as age old problems such as homicide genocide and racial tension At the same time scholarly research is leading us to appreciate how emotion helps us to understand and transcend our selfish interests to connect with others to feel what is just and moral and not just think it and to construct societies and cultures that govern our joint efforts This book draws upon scholarly research to address explain and legitimize the role that emotion plays in everyday interaction and in many of the pressing social moral and cultural issues that we face today Encyclopedia of Social Theory Austin Harrington, Barbara L. Marshall, Hans-Peter Müller, 2006 The Encyclopedia of Social Theory contains over 500 entries varying from concise definitions of key terms and short biographies of key theorists to comprehensive surveys of leading concepts debates themes and schools The object of the Encyclopedia has been to give thorough coverage of the central topics in theoretical sociology as well as terms and concepts in the methodology and philosophy of social science Although 106 theorists are given entries the emphasis of the work is on the elucidation of ideas rather than intellectual biography The Encyclopedia covers the leading contemporary domains of debate on social theory and the classical legacies of social thinkers from the nineteenth and early twentieth centuries giving proper balance to both the European and North American traditions and to important new developments in the global self understanding of sociology Social theory has become one of the most vigorous specialisms of sociology in recent years This is in part due to the considerable overlaps of social theory with other disciplinary areas such as cultural and media studies anthropology and political theory and to the cross disciplinary nature of theoretical approaches such as feminism and psychoanalysis and new fields such as postcolonial studies The editors have therefore worked to produce in the Encyclopedia of Social Theory a first call reference for students and researchers across the social sciences and humanities with an interest in contemporary theory and the modern history of ideas The Encyclopedia has been authored by leading international specialists in the field under the direction of a well balanced editorial team It is comprehensively cross referenced and all larger entries carry bibliographies There is a full index The Oxford Handbook of Evolution

of affect or emotional choice theory into the field of International Relations The logic of affect posits that actors behavior is shaped by the dynamic interplay among their norms identities and five key emotions fear anger hope pride and humiliation Markwica puts forward a series of propositions that specify the affective conditions under which leaders are likely to accept or reject a coercer's demands To infer emotions and to examine their influence on decision making he develops a methodological strategy combining sentiment analysis and an interpretive form of process tracing He then applies the logic of affect to Nikita Khrushchev s behavior during the Cuban missile crisis in 1962 and Saddam Hussein s decision making in the Gulf conflict in 1990 1 offering a novel explanation for why U S coercive diplomacy succeeded in one case but not in the What Emotions Really Are Paul E. Griffiths, 2008-04-15 In this provocative contribution to the philosophy of science and mind Paul E Griffiths criticizes contemporary philosophy and psychology of emotion for failing to take in an evolutionary perspective and address current work in neurobiology and cognitive science Reviewing the three current models of emotion Griffiths points out their deficiencies and constructs a basis for future models that pay equal attention to biological fact and conceptual rigor Griffiths has written a work of depth and clarity in an area of murky ambiguity producing a much needed standard at the border of science philosophy and psychology As he presents his case offering a forthright critique of past and present theories Griffiths touches on such issues as evolution social construction natural kinds categories corresponding with real distinctions in nature cognition and moods While addressing specialists the book will reward general readers who apply themselves to its remarkably accessible style Library Journal What Emotions Really Are makes a strong claim to be one of the best books to have emerged on the subject of human emotion Ray Dolan Nature Neuroscience and the Economics of Decision Making Alessandro Innocenti, Angela Sirigu, 2013-06-19 In the last two decades there has been a flourishing research carried out jointly by economists psychologists and neuroscientists This meltdown of competences has lead towards original approaches to investigate the mental and cognitive mechanisms involved in the way the economic agent collects processes and uses information to make choices This research field involves a new kind of scientist trained in different disciplines familiar in managing experimental data and with the mathematical foundations of decision making The ultimate goal of this research is to open the black box to understandthe behavioural and neural processes through which humans set preferences and translate these behaviours into optimal choices This volume intends to bring forward new Language and Emotion.
