Federal Trade Commission,2003 Innovation benefits consumers through the development of new and improved goods services and processes Competition and patents stand out among the federal policies that influence innovation Both competition and patent policy can foster innovation but each requires a proper balance with the other to do so This report by the Federal Trade Commission discusses and makes recommendations for the patent system to maintain a proper balance with competition law and policy      The Patentability of Software Anton Hughes,2019-02-18 This book explores the question of whether software should be patented It analyses the ways in which the courts of the US the EU and Australia have attempted to deal with the problems surrounding the patentability of software and describes why it is that the software patent issue should be dealt with as a patentable subject matter issue rather than as an issue of novelty or nonobviousness Anton Hughes demonstrates that the current approach has failed and that a fresh approach to the software patent problem is needed The book goes on to argue against the patentability of software based on its close relationship to mathematics Drawing on historical and philosophical accounts of mathematics in pursuit of a better understanding of its nature and focusing the debate on the conditions necessary for mathematical advancement the author puts forward an analytical framework centred around the concept of the useful arts This analysis both explains mathematics and therefore software s nonpatentability and offers a theory of patentable subject matter consistent with Australian American and European patent law      Innovation for the 21st Century Michael A.
