Pathophysiology Of Pain Perception Plenum Series In Rehabilitation And Health:

Pathophysiology of Pain Perception Stefan Lautenbacher, Roger B. Fillingim, 2012-12-06 Under certain pathological conditions the pain processing system which includes both physiological and psychological components can produce the experience of pain in the absence of any peripheral noxious event Considerable evidence now indicates that alterations in pain perception are characteristic of many clinical pain states Pathophysiology of Pain Perception primarily examines these pathological alterations in the pain signaling system with contributions from leading researchers in the field focusing on the functioning of the pain processing system under normal and pathological conditions The understanding of pain perception is essential for optimal diagnosis and treatment of acute and chronic pain This book covers the basics of pain perception peripheral and central neurotransmission methods of assessment various pathological chronic pain conditions neurological and psychiatric diseases cardiovascular disease and non pathological alterations of pain perception pregnancy labor as well as the treatments aiming at influencing pain perception such as pharmacological physical and psychological treatments

Distress Tolerance Michael J. Zvolensky, Amit Bernstein, Anka A. Vujanovic, 2011-03-14 This state of the art volume synthesizes the growing body of knowledge on the role of distress tolerance the ability to withstand aversive internal states such as negative emotions and uncomfortable bodily sensations in psychopathology Prominent contributors describe how the construct has been conceptualized and measured and examine its links to a range of specific psychological disorders Exemplary treatment approaches that target distress tolerance are reviewed Featuring compelling clinical illustrations the book highlights implications of the research for better understanding how psychological problems develop and how to assess and treat them effectively *Predictive, Preventive, and Personalised Medicine: From Bench to Bedside* Halina

Podbielska, Marko Kapalla, 2023-10-30 This volume presents advanced bio medical sciences with a particular value for translating research achievements into daily medical practice in the framework of Predictive Preventive and Personalised Medicine 3PM PPPM First two decades of the 21st century are characterised by epidemics of non communicable diseases such as many hundreds of millions of patients diagnosed with cardiovascular diseases and the type 2 diabetes mellitus breast lung liver and prostate malignancies neurological sleep mood and eye disorders amongst others Consequent socio economic burden is tremendous Unprecedented decrease in age of maladaptive individuals has been reported The absolute majority of expanding non communicable disorders carry a chronic character over a couple of years progressing from reversible suboptimal health conditions to irreversible severe pathologies and cascading collateral complications The paradigm change from reactive to predictive preventive and personalised medicine is essential to promote population health by application of individualised patient profiling multi parametric analysis leading to cost effective targeted prevention To this end inadequate data for risk assessment on speed and urgency of COVID 19 combined with increased globalization of human society led to the rapid spread of COVID 19 Despite an abundance of digital methods that could be used in slowing or stopping this virus

and future pandemics the world remains unprepared and lessons have not been learned from previous cases of pandemics The book presents PPPM strategies which might be of great clinical utility for future pandemics In a long term way a significantly improved healthcare economy is one of the clear benefits of the proposed paradigm shift a tight collaboration between all stakeholders including scientific community healthcare providers patient organisations policy makers and educators is analysed for the smooth implementation of the 3PM concepts Further issues linked to big data management and medical ethics have to be carefully treated in the context of application of artificial intelligence in medicine The British National Bibliography Arthur James Wells,2004 *Bonica's Management of Pain* Scott M.
