Goldacre,2013-02-05 We like to imagine that medicine is based on evidence and the results of fair testing and clinical trials In reality those tests and trials are often profoundly flawed We like to imagine that doctors who write prescriptions for everything from antidepressants to cancer drugs to heart medication are familiar with the research literature about a drug when in reality much of the research is hidden from them by drug companies We like to imagine that doctors are impartially educated when in reality much of their education is funded by the pharmaceutical industry We like to imagine that regulators have some code of ethics and let only effective drugs onto the market when in reality they approve useless drugs with data on side effects casually withheld from doctors and patients All these problems have been shielded from public scrutiny because they re too complex to capture in a sound bite But Ben Goldacre shows that the true scale of this murderous disaster fully reveals itself only when the details are untangled He believes we should all be able to understand precisely how data manipulation works and how research misconduct in the medical industry affects us on a global scale With Goldacre s characteristic flair and a forensic attention to detail *Bad Pharma* reveals a shockingly broken system and calls for regulation This is the pharmaceutical industry as it has never been seen before *Oxford Textbook of Axial Spondyloarthritis* Robert Inman,Joachim Sieper,2016 Part of the Oxford Textbooks in Rheumatology series this volume will cover the significant recent advances in the genetics classification and treatment of Axial Spondyloarthritis making this text a timely addition to the medical literature *Practical Teaching in Emergency Medicine* Robert L. chapters have few references This first person approach to a multi authored textbook yields a compilation that varies in style from chapter to chapter and exposes the reader to a variety of communication techniques **Medico-Legal Issues in Infectious Diseases** I.W.
