Design for London was a unique experiment in urban planning design and strategic thinking. Set up in 2006 by Mayor Ken Livingstone and his Architectural Advisor Richard Rogers, the brief for the team was to think about London, what made London unique and how it could be made better. Sitting within London government but outside its formal statutory responsibilities, it was given freedom to question and challenge. The team had no power or money but it did have the licence to operate without the usual constraints of government. With introductions from Ken Livingstone and Richard Rogers, Design for London covers the tumultuous and heady period of the first decade of this century when London was a test bed for new ideas. It outlines how key projects such as the London Olympics, public space programmes, high street regeneration and greening programmes were managed, critically examines the lessons that might be learnt in strategic urban design and considers how a design agenda for London could be developed in the future.      Moody's OTC Industrial Manual, 1991. Gehl adeptly uses a mix of software studies, science and technology studies and political economy to reveal the histories and contexts of these social media sites. Looking backward at divisions of labor and the process of user labor, he provides case studies that illustrate how binary. Like consumer choices, hide surveillance systems.

that rely on users to build content for site owners who make money selling user data and that promote a culture of anxiety and immediacy over depth Reverse Engineering Social Media also presents ways out of this paradox illustrating how activists academics and users change social media for the better by building alternatives to the dominant social media sites

Pineda,C.A. Brebbia,2016-06-28 Sustainable Tourism VII contains papers presented at the seventh in a series of meetings on the topic organised by the Wessex Institute The papers included in the book address problems including social costs and ecological impacts that have arisen as tourism has become an important component of development Many ancient local cultures have practically lost their identity as their economies have become solely oriented to the tourism industry Both the natural and cultural rural or urban landscapes have also paid a high price for certain forms of tourism These problems will persist to the point of being ruinous if economic benefit is the only target It is also a grave error to disregard the increasing cultural and environmental standards that visitors demand nowadays Natural ecosystems are now a rarity on the planet and ecologists talk today about socio ecosystems Natural changes are inherent in the Earth s ecosystem Technological and social changes are inherent to mankind and are now becoming widespread Cities are growing rapidly and industry requires increasingly larger areas Many traditional rural areas are being abandoned Tourism should play an important role in this context Thus interestingly many historic agricultural districts have maintained or even recovered their local population numbers through intelligent strategies of tourism focused on nature and rural culture

Natural landscapes and biodiversity are becoming increasingly appreciated The tourism industry must be able to respond to these aspirations The papers in the book present new solutions to protect the natural and cultural landscape by minimizing the adverse effects of tourism Topics addressed include Tourism strategies Environmental issues Community issues Climate change Safety and security Tourism as a tool of development Cultural tourism Heritage tourism Wildlife and adventure tourism Health and wellbeing tourism Medical tourism Marine and coastal areas tourism Sport tourism City tourism Tourism impact Tourism and protected areas Ecotourism Rural tourism Industrial tourism Tourism and technology Transport and tourism Education and tourism Theme parks and leisure Destination management Planning and development eTourism Simulation models Social and physical infrastructure
