## **Passion And Craft Economists At Work:**

**Passion and Craft** Michael Szenberg, 1998 Autobiographical essays from twenty top economists at mid career

**Distinguished Women Economists** Julianne Cicarelli, 2003-10-30 Women are vital members of the economics profession yet they have traditionally received scant recognition for their work This volume provides information on 51 remarkable women in the profession They come from all areas of economics academia the business world public policy and include those who are currently active as well as 19th century pioneers in the field Entries cover biographical information as well as the subjects work providing a unique guide to the many and varied contributions these women have made to economics Joan Robinson was one of the most significant economists of the 20th century Juanita Morris Kreps was Secretary of Commerce under Jimmy Carter And forecasting guru Abbey Joseph Cohen appears regularly on PBS CNN and CNBC Women are vital members of the economics profession yet they have traditionally received scant recognition for their work This volume provides information on 51 remarkable women in the profession They come from all areas of economics academia the business world public policy and include those who are currently active as well as 19th century pioneers in the field Entries cover biographical information as well as the subjects work providing a unique guide to the many and varied contributions these women have made to economics Seeking to provide balanced coverage this book covers accomplished and emerging economists living and deceased individuals and women from all philosophical perspectives and economic areas Some have worked in several areas Kathleen Bell Cooper for instance was Chief Economist at Exxon Corporation and is now Under Secretary of Commerce for Economic Affairs while Marina Whitman now with the University of Michigan Business School was a senior executive with General Motors and the first woman appointed to the President s Council of Economic Advisors Others have spent their career in academia All have been prolific writers as their entries document and all made their mark on economics This book is a testament to their achievements      *Regional Economic Change in Europe* Gert-Jan Hospers, 2004 In this era of ongoing globalization a coherent vision on Europe s changing geo economy is more important than ever before Drawing on the work of Schumpeter Fourasti e and Perroux the book at hand offers a new and policy oriented perspective on regional economic change in Europe Conceptually it develops a middle range theory by extending Schumpeter s vision with a sectoral and spatial dimension This neo Schumpeterian framework is concretized by exploring fifty years of structural change in Sardinia the Ruhrgebiet and the resund      The SAGE Handbook of the Philosophy of Social Sciences Ian C Jarvie, Jesus Zamora-Bonilla, 2011-03-14 In this exciting Handbook Ian Jarvie and Jes s Zamora Bonilla have put together a wide ranging and authoritative overview of the main philosophical currents and traditions at work in the social sciences today Starting with the history of social scientific thought this Handbook sets out to explore that core fundamentals of social science practice from issues of ontology and epistemology to issues of practical method Along the way it investigates such notions as paradigm empiricism postmodernism naturalism language agency power culture and causality

**Prediction or Prophecy?** Gregor Betz, 2007-10-06 Knowing in order to predict It was this leitmotiv alone that Auguste Comte in the 19th century considered suitable for the then rapidly developing empirical sciences This view remains unchanged until today not only in the empirical sciences themselves but also in the philosophy of science A scientific theory is and should be evaluated primarily on the grounds of its capacity to correctly predict observable phenomena The aim of predicting takes precedence over the other important aim of science namely to produce and purposefully manipulate phenomena by technical means in the laboratory moreover it even includes the latter For if scientists successfully produce and manipulate certain phenomena in an experiment they can ipso facto predict how that experiment will evolve under certain conditions We live in a scientifically dominated world The more science progresses the more important correct scientific predictions become To a sometimes even fatal extent we have made ourselves dependent on science and its results Our scientific technological interventions into nature yet also into social processes cover ever larger spatial and temporal distances and the consequences are ever more drastic given the increasing effort that would be required to reverse the effects if that is possible at all That is the reason why we ought to be very well informed about the consequences of our actions in particular those based on science and technology

**Wireless Sensor Networks and Applications** Yingshu Li, My T. Thai, 2008-02-10 Wireless sensor networks are being employed in a variety of applications ranging from medical to military and from home to industry The principle aim of this book is to provide a reference tool for the increasing number of scientists who depend upon sensor networks in some way The book is organized into several sections each including chapters exploring a specific topic Wireless sensor networks are attracting great attention and there are many research topics yet to be studied In this book the topics covered include network design and modelling network management data management security and applications The articles presented in the book are expository but of a scholarly nature including the appropriate history background a review of the state of the art thinking relative to the topic as well as a discussion of unsolved problems that are of special interest The target readers of this book include the researchers in computer science computer engineering and applied mathematics as well as students in these subjects Specialists as well as general readers will find the articles stimulating and helpful

**Book Organization** The book is organized into five sections Section I introduces the design and modelling of sensor networks Chapter 1 by Iyer Kulkarni Mhatre and Rosenberg presents a taxonomy of wireless sensor networks based on their application level objectives traffic characteristics and data delivery requirements Popa and Lewis in Chapter 2 describe some algorithms for systematic exploration of unknown environments using a mobile wireless sensor network

**The Politics of Method in the Human Sciences** George Steinmetz, 2005-05-16 Collection of new essays on the past present and future of positivism in the various social sciences

**The Effortless Economy of Science?** Philip Mirowski, 2004 A compilation of essays by the author that reveals the value for science studies of examples arising within the history of economics

**Law and Economics** Alain Marciano, 2013-09-13 This book brings together the most authoritative articles on Law and Economics and

the interaction between the two disciplines as well as the use of economic tools to analyse legal problems Aimed at students experiencing the subject for the first time the selections are interlaced with a wealth of features including explanatory introductions and exercises Key features of the reader include The accessibility of the material the articles should be understandable to those with only a limited background in economics and law The book s focus on the most important and basic foundational issues in law and economics An exposition of the opposition between the different legal systems that exist in the world including common law civil law and public law Debates viewed from the perspective of the scholars from a range of backgrounds are presented as well as all the key figures in economics and in law The book should prove to be an essential resource to all students studying this burgeoning field and represents an exciting introduction to one of the key disciplines which has grown up in the social sciences in recent times      *Complex Adaptive Systems* John H. Miller, Scott E.

Page, 2009-11-28 This book provides the first clear comprehensive and accessible account of complex adaptive social systems by two of the field s leading authorities Such systems whether political parties stock markets or ant colonies present some of the most intriguing theoretical and practical challenges confronting the social sciences Engagingly written and balancing technical detail with intuitive explanations *Complex Adaptive Systems* focuses on the key tools and ideas that have emerged in the field since the mid 1990s as well as the techniques needed to investigate such systems It provides a detailed introduction to concepts such as emergence self organized criticality automata networks diversity adaptation and feedback It also demonstrates how complex adaptive systems can be explored using methods ranging from mathematics to computational models of adaptive agents John Miller and Scott Page show how to combine ideas from economics political science biology physics and computer science to illuminate topics in organization adaptation decentralization and robustness They also demonstrate how the usual extremes used in modeling can be fruitfully transcended      *An Economic Analysis of*

*the University* Jutta Merschen, 2012-02-13 During the last few years the German higher education landscape has witnessed an increase in the delegation of decision power from the state to the universities In order to adapt to this new situation universities are more and more looking at management structures decision making systems and governance mechanisms as fundamental performance drivers The objective of this dissertation is to provide an economic insight into the inner workings of universities in Germany thus answering the question of how they should organize themselves in order to persist in times of economic organizational and competitive challenges Special focus lies on the analysis of the role of faculty in participative university decision making and its positive and negative effects on the university Based on theoretical and empirical analysis the dissertation outlines policy recommendations that may help to overcome the problems inherent in today s university management and governance structures in Germany      *The Human Society and the Internet: Internet Related*

*Socio-Economic Issues* Won Kim, Tok-Wang Ling, Yoon-Joon Lee, Seung-Soo Park, 2003-06-29 During the past several years the world has entered the first phase of the Internet Revolution Investors showed confidence and faith in the prospects of the

Internet driven economy In the US alone some 30 000 dot com companies have sprung up to support electronic commerce with a wide variety of business models technologies and or items or services to sell or even give away Traditional businesses so called brick and mortar or offline businesses have started to respond to challenges by Internet based new competitors by augmenting their own businesses with Internet based or online businesses and or filing lawsuits against them The initial business to consumer orientation of electronic commerce is giving way to business to business commerce with large corporations forming electronic exchanges or consortia to conduct commerce among members Government industry and civic groups have started addressing social issues related to the Internet such as taxation on electronic commerce privacy intellectual property rights security hacking cyber crimes digital divide etc Governments have started legitimizing electronic signatures and stepping up efforts to track down perpetrators of cyber crimes The courts have started to wrestle with issues of privacy intellectual property rights crimes and impediments to Internet driven economy

**Foundations of Quantization for Probability Distributions** Siegfried Graf, Harald Luschgy, 2000-05-16 Due to the rapidly increasing need for methods of data compression quantization has become a flourishing field in signal and image processing and information theory The same techniques are also used in statistics cluster analysis pattern recognition and operations research optimal location of service centers The book gives the first mathematically rigorous account of the fundamental theory underlying these applications The emphasis is on the asymptotics of quantization errors for absolutely continuous and special classes of singular probabilities surface measures self similar measures presenting some new results for the first time Written for researchers and graduate students in probability theory the monograph is of potential interest to all people working in the disciplines mentioned above

*Novel Pedagogy* Liwen Zhang, 2024-10-01 Is the novel a category of knowledge that merits serious study Even if the novel has shed the stigma of being mindless entertainment one might easily assume that reading a novel is not studying unless one reads closely and carefully preferably from a scholarly edition or for a scholarly purpose *Novel Pedagogy* explores how Victorian writers envisioned the novel s potential to become knowledge long before the form s ascendance into the ivory tower Liwen Zhang argues that Victorian novelists constant critique of schooling on the one hand and their frequent invocation of deep knowledge on the other are not self contradictory Instead of offering a blissful escape from education writers such as William Thackeray Charles Kingsley Charles Dickens Elizabeth Gaskell George Eliot and George Gissing seek to offer uniquely novelistic pathways to knowledge *Novel Pedagogy* offers a new model of novelistic epistemology by showing how the novel unlike other educational genres reflects on the unpleasant realities of learning and of not learning amid the ubiquity of ineffective textbooks reluctant students and false motivations

**How to be Human-- Though an Economist** Deirdre N. McCloskey, 2000 A witty and thoughtful romp through the profession and practice of economics

**Passion, Craft, and Method in Comparative Politics** Gerardo L. Munck, Richard Snyder, 2007-07-02 In the first collection of interviews with the most prominent scholars in comparative politics since World War II Gerardo L Munck

and Richard Snyder trace key developments in the field during the twentieth century Organized around a broad set of themes intellectual formation and training major works and ideas the craft and tools of research colleagues collaborators and students and the past and future of comparative politics these in depth interviews offer unique and candid reflections that bring the research process to life and shed light on the human dimension of scholarship Giving voice to scholars who practice their craft in different ways yet share a passion for knowledge about global politics *Passion Craft and Method in Comparative Politics* offers a wealth of insights into contemporary debates about the state of knowledge in comparative politics and the future of the field Ibss: Economics: 1999 Compiled by the British Library of Political and Economic Science,2000-12-07

IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences Finding your Social Science Project John Gerring,Jason Seawright,2022-10-13 The most important step in social science research is the first step finding a topic Unfortunately little guidance on this crucial and difficult challenge is available Methodological studies and courses tend to focus on theory testing rather than theory generation This book aims to redress that imbalance The first part of the book offers an overview of the book s central concerns How do social scientists arrive at ideas for their work What are the different ways in which a study can contribute to knowledge in a field The second part of the book offers suggestions about how to think creatively including general strategies for finding a topic and heuristics for discovery The third part of the book shows how data exploration may assist in generating theories and hypotheses The fourth part of the book offers suggestions about how to fashion disparate ideas into a theory **Idealization XIV: Models in Science** Giacomo

Borbone,Krzysztof Brzechczyn,2016-05-23 Idealization XIV Models in Science offers a detailed ontological epistemological and historical account of the role of models in scientific practice The volume contains contributions of different international scholars who developed many aspects of the use of idealizations and models both in the natural and the social sciences This volume is particularly relevant because it offers original contributions concerning one of the main topic in philosophy of science the role of models in such branches of the sciences and the humanities like comparative historical sociology economics history linguistics and political philosophy Contributors are Giacomo Borbone Krzysztof Brzechczyn Mieszko Ciesielski Adam Czerniak Xavier de Donato Rodr guez Jos L Falguera Adolfo Garc a de la Sienra Lidia Godek Igor Hanzel ukasz Hardt Krzysztof Kiedrowski Barbara Konat Zenonas Norkus Piotr Przybysz Piotr Szwochert The Oxford Handbook of Law and Economics Francesco Parisi,2017 The Oxford Handbook of Law and Economics applies the theoretical and empirical methods of economics to the study of law Volume 1 surveys methodology and concepts
