**Modern China's Foreign Policy** Werner Levi, 1953-01-01 Modern China's Foreign Policy was first published in 1953 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions What are China's objectives in world affairs and what course will she pursue to achieve her goals These are the questions of vital concern to the Western democracies questions that can be approached intelligently only from a knowledge of how China's foreign policy has developed In this illuminating and carefully documented book Professor Levi analyzes China's attitudes and actions toward the rest of the world and clarifies many motivations behind her behavior past and present He traces the development of her foreign relations from the beginning of the modern era of Chinese contacts with Westerners a little more than hundred years ago The emphasis however is on the twentieth century and particularly on the years since the peace settlements of World War I The complex balance of relationships between China and the United States on the one hand and China and the Soviet Union on the other since the end of World War II is discussed in detail Communist doctrine notwithstanding its apparent rigidity is shown to be a conveniently adjustable tool capable of adaptation to the needs and strategies of present day China An integral part of the account is the attempt to single out and interpret the internal forces cultural social and economic that have influenced and shaped China's external policies Thus it is shown that the determinants of China's foreign policy have often been pressures and complexities within the country and that an understanding of the Chinese people and their traditions is essential to nations in their dealings with China

**China, the United Nations and World Order** Samuel S. Kim, 2015-03-08 China s role in the United Nations has been a significant one Yet Samuel Kim contends as

far as the literature on Chinese foreign policy is concerned the People's Republic of China still remains outside the heuristic framework of the global community. In a comprehensive macro analysis of Chinese global politics Professor Kim probes China's image and strategy of world order as manifested through its behavior in the UN. The author draws upon a wide range of previously untapped primary sources including China's policy pronouncements and voting record and over a hundred personal interviews with UN delegates and international civil servants. He finds that Chinese participation has made the United Nations not only more representative but also more relevant as the global political institution responding to the challenge of establishing a more humane and just world order. **International Order in a Globalizing World** Yannis A. Stivachtis, 2016-04-22. There is a growing recognition that globalization is leading to fundamental changes in world order, creating new imperatives and requiring new ways of understanding the international system. Two of the most important actors in the contemporary international system are the United States and Europe, and their relationship is fundamental in shaping international order. International order shapes and is also being shaped by the forces of globalization, whether cultural, political, or economic. This volume examines issues that transcend national and cultural boundaries, discussing international order from the perspective of the English School of International Relations. It covers areas such as great powers, foreign policy, relations among great powers, sovereignty, democracy, and legitimacy, international terrorism and intelligence, and institutions and international organizations. Ultimately, it analyzes what is to be done to assure a stable international order. The volume is relevant to security studies, foreign policy, transatlantic relations, and international organizations, as well as international relations theory. **JAIR Journal of**

Simon, Evelyn Goh, 2007-08-09 China's emergence as a great power is a global concern that can potentially alter the structure of world politics. Its rise is multidimensional, affecting the political security and economic affairs of all states that comprise the world's fastest developing region of the Asia Pacific.
