*Hunter-Gatherers* Robert L. Bettinger, 2013-11-11 Hunter gatherers are the quintessential anthropological topic They constitute the subject matter that in the last instance separates anthropology from its sister social science disciplines psychology sociology economics and political science In that central position hunter gatherers are the acid test to which any reasonably comprehensive anthropological theory must be applied Several such theories some narrow some broad are examined in light of the hunter gatherer case in this book My purpose then is that of a review of ideas rather than of a literature I do not probably could not survey all that has been written about hunter gatherers Many more works are ignored than considered That is not because the ones ignored are uninteresting but because it is my broader purpose to concentrate on certain theoretical contributions to anthropology in which hunter gatherers figure most prominently The book begins with two chapters that deal with the history of anthropological research and theory in relation to hunter gatherers The point is not to present a comprehensive or even handed accounting of developments Rather I sketch a history of selected ideas that have determined the manner in which social scientists have viewed and thus studied hunter gatherers This lays the groundwork for subjects subsequently addressed and establishes two fundamental points First the social sciences have always portrayed hunter gatherers in ways that serve their theories in short hunter gatherer research has always been a theoretical enterprise Second these theoretical treatments have generally been either evolutionary or materialist or both in perspective

**Hunters and Gatherers in the Modern World** Peter P. Schweitzer, Megan Biesele, Robert K. Hitchcock, 2000 In light of negotiations now going on between people who rely on wild plants and animals and the governments of their territories about civil political social economic and cultural rights anthropologists explore dimensions of culture and pressures as they are manifested in particular peoples Their 27 papers from an August 1993 conference in Moscow Russian cover warfare and conflict resolution resistance identity and the state ecology demography and market issues gender and representation and world view and religious determination The examples come from most of the world's continents Annotation copyrighted by Book News Inc Portland OR

Transformations and Development Governance and Globalization      *Farmers as Hunters* Susan Kent, 1989-08-31 Farmers as hunters analyses from an essentially ethnographic perspective the role of hunters in small scale farming societies The twelve contributors examine the effects of hunting and mobility on behaviour diet economy and material culture at both culture specific and cross cultural levels The influence of sedentism and the increasing use of domesticates is also explored across a wide range of societies from the American southwest and Amazonian to Africa New Guinea and the Phillipines Differing perceptions of the status of animals and plants are reviewed and cultural values are throughout given due weight in a field where discussion too often verges on the economically deterministic      *Borneo Studies in History, Society and Culture* Victor T. King, Zawawi Ibrahim, Noor Hasharina Hassan, 2016-08-12 This edited book is the first major review of what has been achieved in Borneo Studies to date Chapters in this book situate research on Borneo within the general disciplinary fields of the social sciences with the weight of attention devoted to anthropological research and related fields such as development studies gender studies environmental studies social policy studies and cultural studies Some of the chapters in this book are extended versions of presentations at the Borneo Research Council s international conference hosted by Universiti Brunei Darussalam in June 2012 and a Borneo Studies workshop organised in Brunei in 2012 The volume examines some of the major debates and controversies in Borneo Studies including those which have served to connect post war research on Borneo to wider scholarship It also assesses some of the more recent contributions and interests of locally based researchers in universities and other institutions in Borneo itself The major strength of the book is the inclusion of a substantial amount of research undertaken by scholars working and teaching within the Southeast Asian region In particular there is an examination of research materials published in the vernacular notably the outpouring of work published in Indonesian by the Institut Dayakologi in Pontianak In doing so the book also addresses the urgent matters which have not received the attention they deserve specifically subjects themes and issues that have already been covered but require further contemplation elaboration and research and the scope for disciplinary and multidisciplinary collaboration in Borneo Studies The book is a valuable resource and reference work for students and researchers interested in social science scholarship on Borneo and for those with wider interests in Indonesia and Malaysia and in the Southeast Asian region

Mfecane Aftermath Carolyn Hamilton,1995 The idea that the period of social turbulence in the nineteenth century was a consequence of the emergence of the powerful Zulu kingdom under Shaka has been written about extensively as a central episode of southern African history Considerable dynamic debate has focused on the idea that this period the mfecane left much of the interior depopulated thereby justifying white occupation One view is that the time of troubles owed more to the Delagoa Bay Slave trade and the demands of the labour hungry Cape colonists than to Shaka s empire building But is there sufficient evidence to support the argument The Mfecane Aftermath investigates the very nature of historical debate and examines the uncertain foundations of much of the previous historiography *Literary History of Canada* William H. The Lifeways of Hunter-Gatherers Robert L. Kelly, 2013-04-15 Challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity The Origins And Spread Of Agriculture And Pastoralism In Eurasia David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization **The Pleistocene Old World** Olga Soffer, 2013-11-11 Regional approaches to past human adaptations have generated much new knowledge and understanding Researchers working on problems of adaptations in the Holocene from those of simple hunter gatherers to those of complex sociopolitical entities like the state have found this approach suitable for comprehension of both ecological and social aspects of human behavior This research focus has however until recently left virtually untouched a major spatial and temporal segment of prehistory the Old World during the Pleistocene Extant literature on this period by and large presents either detailed site specific accounts or offers continental or even global syntheses that tend to compile site specific information but do not integrate it into whole constructs of functioning sociocultural entities This volume presents our current state of knowledge about a variety of regional adaptations that characterized prehistoric groups in the Old World before 10 000 B P The authors of the chapters consider the behavior of humans rather than that of objects or features and present data and models for various aspects of past cultures and for culture change These presentations integrate findings and understandings derived from a number of related disciplines

actively involved in researching the past Data and interpretations are offered on a range of Old world regions during the Paleolithic including Africa Asia Australia and Europe and chronological coverage spans from the Early to Late Pleistocene
