## **Patient Safety First Responsive Regulation In Health Care:**

**Patient Safety First** Paul Dugdale, 2020-07-29 Each year more people die in health care accidents than in road accidents. Increasingly complex medical treatments and overstretched health systems create more opportunities for things to go wrong and they do. Patient safety is now a major regulatory issue around the world and Australia has been at its leading edge. Self-regulation by professional and industry groups is now widely regarded as insufficient and government is stepping in. In *Patient Safety First*, leading experts survey the governance of clinical care. Framed within a theory of responsive regulation, core regulatory approaches to patient safety are analysed for their effectiveness, including information systems, corporate and public institution governance models, the design of safe systems, the role of medical boards, open disclosure and public inquiries. *Patient Safety First* includes chapters by Bruce Barracough, John Braithwaite, Stephen Duckett and Ian Freckleton. SC It is essential reading for all medical and legal professionals working in patient safety as well as readers in public health, health policy and governance.

**Health Workforce Governance** Stephanie D. Short, 2016-04-22 With increasing recognition of the international market in health professionals and the impact of globalism on regulation, the governance of the health workforce is moving towards greater public engagement and increased transparency. This book discusses the challenges posed by these processes, such as improved access to health services and how structures can be reformed so that good practice is upheld and quality of service and patient safety are ensured. With contributions from regulators, academics, lawyers and health professionals, this book presents arguments from multiple perspectives. Of global relevance, it brings together concerns about access, quality and safety within the framework of the health workforce governance continuum and will be of interest to policy makers, regulators, health professionals, academics, legal practitioners, insurers, students and researchers.

Aimed at practitioners, postgraduate students and those interested in regulation as a cross-cutting theme in the social sciences, *Regulatory Theory* includes chapters on the social psychological foundations of regulation as well as theories of regulation, such as responsive regulation, smart regulation and nodal governance. It explores the key themes of compliance, legal pluralism, meta-regulation, the rule of law, risk, accountability, globalisation and regulatory capitalism. The environment, crime, health, human rights, investment, migration and tax are among the fields of regulation considered in this ground-breaking book. Each chapter introduces the reader to key concepts and ideas and contains suggestions for further reading. The contributors, who either are or have been connected to the Regulatory Institutions Network (RegNet) at The Australian National University, include John Braithwaite, Valerie Braithwaite, Peter Grabosky, Neil Gunningham, Fiona Haines, Terry Halliday, David Levi-Faur, Christine Parker, Colin Scott and Clifford Shearing.
