remembered mainly for the promotion of a novel form of global governance the so called partnerships for sustainable development This book provides a first authoritative assessment of partnerships for sustainable development ten years after the Johannesburg Summit The extensive research builds on a unique Global Sustainability Partnerships Database and a series of in depth qualitative case studies Key questions studied in this book include the overall effectiveness and influence of partnerships their geographical functional and organizational scope and their legitimacy This unique book systematically investigates the questions of emergence influence and legitimacy which will prove invaluable for scholars and students interested in global environmental governance and sustainability public private partnerships sustainability at the UN level and environmental governance beyond international agreements and policies Handbook of Global Environmental Politics Peter Dauvergne,2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come Governing the Provision of Ecosystem Services Roldan Muradian,Laura Rival,2012-11-13 Founded on the core notion that we have reached a turning point in the governance and thus the conservation of ecosystems and the environment this edited volume features more than 20 original chapters each informed by the paradigm shift in the sector over the last decade Where once the emphasis was on strategies for conservation enacted through instruments of control such as planning and polluter pays legislation more recent developments have shown a shift towards incentive based arrangements aimed at those responsible for providing the environmental services enabled by such ecosystems Encouraging shared responsibility for watershed management developed in Costa Rica is a prime example and the various interests involved in its instauration in Java are one of the subjects examined here Forest People Interfaces Bas Arts,Séverine van Bommel,Mirjam Ros-Tonen,Gerard Verschoor,2012-05-22 This book aims at both academics and professionals in the field of forest people interfaces It takes the reader on a journey through four major themes that have emerged since the initiation of social forestry in the 1970s non

timber forest products and agroforestry community based natural resource management biocultural diversity and forest governance In so doing the books offers a comprehensive and current review on social issues related to forests that other more specialized publications lack It is also theory rich offering both mainstream and critical perspectives and presents up to date empirical materials Reviewing these four major research themes the main conclusion of the book is that na ve optimism associated with forest people interfaces should be tempered The chapters show that economic development political empowerment and environmental aims are not easily integrated Hence local landscapes and communities are not as makeable as is often assumed Events that take place on other scales might intervene local communities might not implement policies locally and governance practices might empower governments more than communities This all shows that we should go beyond community based ideas and ideals and look at practices on the ground

Rethinking Authority in Global Climate Governance Thomas Hickmann, 2015-10-16 In the past few years numerous authors have highlighted the emergence of transnational climate initiatives such as city networks private certification schemes and business self regulation in the policy domain of climate change While these transnational governance arrangements can surely contribute to solving the problem of climate change their development by different types of sub and non state actors

does not imply a weakening of the intergovernmental level On the contrary many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states Thus this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change UNFCCC and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose This book will be of great interest to students and scholars of global environmental politics climate change and sustainable development
