**Emotions Online** Alan Petersen,2022-12-30 Digital media have become deeply immersed in our lives heightening both hopes and fears of their affordances While the internet mobile phones and social media offer their users many options they also engender concerns about their manipulations and intrusions **Emotions Online** explores the visions that shape responses to media and the emotional regimes that govern people's engagements with them This book critically examines evidence on the role of digital media in emotional life Offering a sociological perspective and using ideas from science and technology studies and media studies it explores The dimensions and operations of the online emotional economy Growing concerns about online harms and abuse especially to children Deepfakes and other forms of image based abuse The role of hope in shaping online behaviours Digital well being and its market COVID 19's impacts on perceptions of digital media and Big Tech Growing challenges to centralised control of the internet and the implications for future emotional life The book breaks new ground in the sociological study of digital media and the emotions It reveals the dynamics of online emotional regimes showing how deceptive designs and algorithm driven technologies serve to attract and engage users As it argues digital media rely on the emotional labours of many people including social media influencers and content moderators who make the internet seem smart The book provides an invaluable overview of the evidence and debates on the role of digital media in emotional life and guidance for future research policy and action

**Work Smart Now** Richard Polak,2021-04-20 From one of the top HR specialists in the world comes this much needed guide to help people maximize productivity and increase revenue Whether it's in corporate America or in our own living rooms people are wasting time From the minute we wake up and check our Facebook page or emails before we even crawl out of bed to late at night when we stay up longer than we should watching our favorite show There's a precise moment that falls between working enough hours to be productive and working too many hours yielding a diminishing marginal return The difference between

the person able to master this and most Americans that fail miserably at it is quality of life If one continues to work past this moment a negative return will ensue and that negative return produces guilt It lowers the amount of time for recreational activities and spending time with family We've siloed productivity to our work life however the impact on our personal life is often loss An alarming 39% of workers in high tech companies believe they are depressed as reported by PC Magazine in December 2018 72% of people who have daily stress and anxiety say it interferes with their lives anxiety and stress alone have reduced productivity by 56% More than 80% of people have experienced some form of anxiety stress or depression in the workplace People are spending more time at work than at home or with their loved ones or if they are at home they are working They are always on As a result of this disparity people are not fully living their lives And the work life balance marketed by some HR consulting firms and employers simply does not work It's all work and no life Studies have also proven that when people are unhappy in their personal lives or careers their productivity goes down and everything and everyone around them suffers This causes a domino effect which trickles into every area of their lives Previous generations used to say Work harder but we've now learned we must work smarter Polak has practiced and tested his methods in hundreds of opportunities and has been paid millions by the largest corporations in the world to share these tools He feels that every individual and business should have these tools and will share them with us here
