**The Biolinguistic Enterprise** Anna Maria Di Sciullo, Cedric Boeckx, 2011-03-17 This book by leading scholars represents some of the main work in progress in biolinguistics. It offers fresh perspectives on language evolution and variation, new developments in theoretical linguistics, and insights on the relations between variation in language and variation in biology. The authors address the Darwinian questions on the origin and evolution of language from a minimalist perspective and provide elegant solutions to the evolutionary gap between human language and communication in all other organisms. They consider language variation in the context of current biological approaches to species diversity, the evo devo revolution, which brings to light deep homologies between organisms. In dispensing with the classical notion of syntactic parameters, the authors argue that language variation like biodiversity is the result of experience and thus not a part of the language faculty in the narrow sense. They also examine the nature of this core language faculty, the primary categories with which it is concerned, the operations it performs, the syntactic constraints it poses on semantic interpretation, and the role of phases in bridging the gap between brain and syntax. Written in language accessible to a wide audience, *The Biolinguistic Enterprise* will appeal to scholars and students of linguistics, cognitive science, biology, and natural language processing.

**Language in a Changing Europe** British Association for Applied Linguistics. Meeting, 1995 This volume contains papers presented at the Annual Meeting of the British Association for Applied Linguistics held at the University of Salford in September 1993. They illustrate the breadth and diversity of research in the field.

**Early Biliteracy Development** Eurydice B. Bauer, Mileidis Gort, 2012-05-22 A large and growing number of students from culturally and linguistically diverse backgrounds in the US and around the world have the potential to develop bilingualism and biliteracy if supported in their immediate environment. At the forefront in focusing exclusively on biliteracy development in early childhood across a variety of languages, this book provides both findings from empirical research with young bilinguals in home and school contexts and practical applications of these findings. Each chapter is structured in a similar format to offer parallel descriptions of the research, including a brief review of related empirical studies, an overview of the methods for data collection and analysis, a description of the main findings, and specific pedagogical implications to support educators' efforts to construct meaningful, challenging, and dynamic literacy and language learning communities where one or more languages are used for communicating and learning. Pushing the field forward, this book is a valuable resource for helping literacy educators understand and respond to critical issues related to the development of young children's literate competencies in two languages in home and school contexts.
