

THE AVIATION FACTFILE

MILITARY AIRCRAFT OF THE COLD WAR

GENERAL EDITOR:
TIM WINCHESTER

Built for speed, the Lightning featured a wing of incredible sweepback. Later models had a small kink added to improve handling.

Although popular with its pilots, the Lightning was not an easy aircraft to fly. The cockpit was fairly cramped, and the instruments and controls were of 1950s vintage.

Military Aircraft of the Cold War Jim Winchester, 2012-07-25 This comprehensive guide to cold war military aircraft features 121 of the greatest military aircraft in service between 1945 and 1985 Each aircraft is covered in detail with feature boxes outlining its development technical specifications performance data and variants Unique graphics allow the reader to compare specific features like range speed and ceiling with those of contemporary aircraft Contains over 2000 photographs and illustrations Military Aircraft of the Cold War is a fascinating and fact filled guide to the finest aircrafts For a generation of aviation buffs iconic aircraft such as the Avro Vulcan B 58 Hustler and F 4 Phantom II hold a certain magic that is unsurpassed by today's aircraft Providing hours of entertaining reading this book covers each aircraft in detail with feature boxes outlining its development technical specifications performance data and variants Unique graphics allow the reader to compare specific features like range speed and ceiling with those of contemporary aircraft All-Weather Fighters Gordon B. Greer, 2006-09-11 Mr Greer outlines the not well known aircraft and activities of the United States Air Force's all weather fighters during the first part of the Cold War He covers the organization development and decline of the all weather force in response to the Soviet Union's long range strategic bomber force equipped with atomic weapons The author describes not only the individual aircraft from the early night fighters of World War II through the F 106A of the seventies and beyond but also the control organization that directed them until the whole operation was made superfluous by the ballistic missile standoff between the United States and the Soviet Union in the latter half of the Cold War North American XB-70 Valkyrie Peter E. Davies, 2018-03-09 Of the many futuristic military aircraft concepts created in the 1950s the North American XB 70 still stands out as the most awe inspiring With its huge white partially folding delta wing its fuselage resembling a striking cobra and its extraordinary performance it was one of the foremost technological achievements of the 20th Century A strategic bomber built to outrun any Soviet fighter jet it could reach Mach 3 with a full nuclear payload as fast as the legendary SR 71 Blackbird but more than three times the size However its role as a nuclear bomber was limited after the introduction of Intercontinental Ballistic Missiles and defence cuts eventually led to the project being scrapped in the mid 1960s The Valkyrie had a brief costly decade of life but it proved the continuing value of developing manned bombers However almost half a century after the XB 70 its predecessor the B 52 continues in service Using full colour artwork and rigorous analysis this is the complete story of the ultimate US Cold War military X plane **B-36 'Peacemaker' Units of the Cold War** Peter E. Davies, 2022-03-17 A fully illustrated study into the extraordinary Convair B 36 during the Cold War Conceived during 1941 in case Germany occupied Britain when US bombers would then have insufficient range to retaliate the B 36 was to be primarily a 10 000 mile bomber with heavy defensive armament six engines and a performance that would prevent interception by fighters Although rapid developments in jet engine and high speed airframe technology quickly made it obsolescent the B 36 took part in many important nuclear test programmes The aircraft also provided the US nuclear

deterrent until the faster B 52 became available in 1955 It was one of the first aircraft to use substantial amounts of magnesium in its structure leading to the bomber s Magnesium Overcast nickname It earned many superlatives due to the size and complexity of its structure which used 27 miles of wiring had a wingspan longer than the Wright brothers first flight equivalent engine power to 400 cars the same internal capacity as three five room houses and 27 000 gallons of internal fuel enough to propel a car around the world 18 times Much was made of the fact that the wing was deep enough to allow engineers to enter it and maintain the engines in flight B 36s continued in the bomber and reconnaissance role until their retirement in February 1959 following 11 years in SAC Convair employees were invited to suggest names for the giant aircraft eliciting suggestions such as King Kong Bomber Condor Texan and Unbelievable but the most popular was Peacemaker Oddly objections from religious groups deterred the USAF from ever adopting it officially This fully illustrated volume includes first hand accounts original photographs and up to 30 profile artworks depicting in detail the complexity of this superlative aircraft High Viz Michael O'Leary,1994 Today modern military aircraft of the US armed forces are wearing perhaps the drabest colour schemes ever seen in the History of the USAF and US Navy However during the height of the Cold War in the 1960s and 70s a riot of garish schemes adorned all manner of types ranging from Century Series interceptors to mundane transport and utility aircraft *Secret US Proposals of the Cold War* Jim Keeshen,2013 At the peak of the Cold War countless proposals for radical and unorthodox US military aircraft were developed In this book rare and historical models of these proposals bear witness to that bygone era and are given recognition through the use of original and archival photography Tomcats and Eagles Tal Tovy,2022-11-15 During the first half of the 1970s two new fighter aircraft entered operational service in the United States The Navy s Grumman F 14 Tomcat and the Air Force s McDonnell Douglas F 15 Eagle These two aircraft were part of the backbone of the tactical air power of the United States their introduction was accompanied by comprehensive reforms in pilot training as well as new technologies and weapon systems In addition to the tactical significance of the two aircraft as innovative fighting platforms however their development and deployment should be viewed within a broad geopolitical and geostrategic context Tovy explains how the F 14 Tomcat and the F 15 Eagle were an integral part of the aerial component of the conventional arms race within the Cold War He argues that the trend of Soviet advanced weapon systems development created a perception of threat to the United States challenging its conventional military power Tomcats and Eagles explores how the Vietnam War accelerated the need for advanced fighter interceptors and that the lessons learned from aerial combat in Vietnam had a significant impact on the design and operational characteristics of the F 15 The author reveals that after F 14s were sold to Iran and F 15s to Israel in the second half of the 1970s these jets were integrated into their armed forces leading to Israel s use of the F 15 during the First Lebanese War Finally the author provides an in depth look at the operation of the F 14 and F 15 in U S actions in Southeast Asia beginning with the Tanker Wars in the mid 1980s through Operation Desert Storm and Operation Enduring

Freedom and ending with Operation Iraqi Freedom Tactical Reconnaissance in the Cold War Doug Gordon, 2005-11-19

The little known stories of the United States Air Force pilots who flew alone and unarmed into enemy territory in a world under threat of nuclear war Tactical Reconnaissance in the Cold War describes how the United States Air Force tactical reconnaissance units operated from the end of World War II until the 1970s This was an immensely active period that also included major conflicts in Korea and Vietnam It was also a period of rapid technological development in aircraft and photographic techniques This highly illustrated book includes chapters on the post war period in Europe and the East the Korean Conflict and the role of the 67th TRW from 1950 to 1954 the role of the highly secret RF 86 missions over Red China and the Soviet Far East in the early to mid 50s the RB 57A missions out of Bitburg and Yokota flying clandestinely over the Soviet Union and the RF 100A missions that were flown over the Soviet Union from Turkey Rhine Main and Yokota United States Air Forces in Europe the Cuban Missile Crisis and the role of the RF 101 Voodoos and RB 66s Valkyrie: the North American XB-70 Graham M. Simons, 2014-08-19 A fascinating insight into one of the Cold War s most interesting concept aircraft with new information photographs and first hand accounts Flypast During the 1950s plans were being drawn at North American Aviation in Southern California for an incredible Mach 3 strategic bomber The concept was born as a result of General Curtis LeMay s desire for a heavy bomber with the weapon load and range of the subsonic B 52 and a top speed in excess of the supersonic medium bomber the B 58 Hustler However in April 1961 Defense Secretary McNamara stopped the production go ahead for the B 70 because of rapid cost escalation and the USSR s newfound ability to destroy aircraft at extremely high altitude using either missiles or the new Mig 25 fighter Nevertheless in 1963 plans for the production of three high speed research aircraft were approved and construction proceeded In September 1964 the first Valkyrie now re coded A V 1 took to the air for the first time and in October went supersonic This book is the most detailed description of the design engineering and research that went into this astounding aircraft It is full of unpublished details photographs and firsthand accounts from those closely associated with the project Although never put into full production this giant six engined aircraft became famous for its breakthrough technology and the spectacular images captured on a fatal air to air photo shoot when an observing Starfighter collided with Valkyrie A V 2 which crashed into the Mojave Desert Well illustrated with numerous diagrams and black and white photographs the book provides an interesting insight into one of the so called white elephant projects of the 1960s Jets Monthly **The F-100 Units of USAFE** Doug Gordon, 2024-01-07 The North American F 100 Super Sabre served with the United States Air Forces in Europe for a total of sixteen years at the height of the Cold War The primary mission of the USAFE units that flew the hun was the delivery of tactical nuclear weapons on targets in the Soviet Union and Eastern Europe The nuclear mission was practised on the gunnery ranges of Europe the Mediterranean region and North Africa The pilots called bomb commanders sat alert all over Europe to take off at a moment s notice and fly alone into the heart of enemy territory carrying just one atomic bomb often more powerful than those dropped on the cities of

Hiroshima and Nagasaki at the end of the Second World War These dedicated pilots acknowledged that many of their targets were situated so far away that there would be no prospect of return to their home base and their families and friends The secondary mission of the USAFE F 100 units was to prepare for conventional war *Red Eagles* Steve Davies,2008-08 In this book the story of a top secret military operation at the heart of U S Air Force Cold War training and planning is told for the first time Red Eagles reveals how beginning in the early 1950s the U S government set about covertly acquiring Soviet aircraft for testing and evaluation a program that over the next four decades developed into specialist units at two Air Force bases and involved Air Force Navy and Marine Corps pilots in top secret top gun fighter training Drawing on interviews with pilots in the program Davies conveys the drama of the American military s first exposure to the Soviets MiG jet fighters and the perils sometimes fatal of testing U S fighters and flying skills against them **Cold War Peacemaker** Don

Pyeatt,Dennis R. Jenkins,2010 Few airplanes in history have captured the imagination like Convair s B 36 Peacemaker The world s first intercontinental bomber served as a strategic deterrent against possible nuclear war and projected the global reach of the Air Force s new Strategic Air Command during the opening years of the Cold War While many books have been written about this aircraft none has ever told one of the most intriguing aspects of the B 36 story the place where the airplane came to be designed manufactured and test flown Once known as Cowtown for its abundance of cattle farms Fort Worth Texas became home to the Convair plant adjacent to Carswell AFB and will forever be linked with the B 36 s place in history This book tells not only the story of this airplane s technical aspects but also the political and social events that led to its development the establishment of Fort Worth as its production site and newly discovered technical information as well

Shadow Flights Curtis Peebles,2000 Historian Peebles draws on previously top secret documents from both countries and the recollections of participants on both sides to recount the US spy plane program against the Soviet Union after World War II The lid was blown off and the program ended with the downing of Francis Gary Powers in his U 2 spyplane Annotation copyrighted by Book News Inc Portland OR *Cockpits of the Cold War* Donald Nijboer,2003 This pictorial book looks inside the cockpit of aircraft from 1947 to 1965 from the United States United Kingdom Sweden Canada France and the Soviet Union Featured aircraft includes a pilot s perspective on what it was like to fly **Dark Eagles** Curtis Peebles,Peebles,1997 An aviation historian tells the story of the Dark Eagles airplanes that the US government developed tested and operated in deepest secrecy They include the Stealth fighter bomber the high altitude U 2 and its successor the A 12 unmanned reconnaissance drones the Soviet MiG ultralight spy aircraft and the Aurora space plane which over the years has been entwined with UFO sightings Information comes from post Cold War Freedom of Information Act requests and from interviews with the people who designed and tested the aircraft Annotation copyright by Book News Inc Portland OR

Spyflights and Overflights Robert Hopkins,2016 Few aviation subjects have been shrouded in more secrecy or been more controversial than Cold War aerial reconnaissance Former reconnaissance pilot Robert S Hopkins III offers new

insights into strategic intelligence flights during the early years of the cold war Primarily undertaken by RB 50s and RB 47s of the Strategic Air Command and by CIA U 2s other Western nations such as Britain Sweden and Taiwan were equally committed to gathering intelligence about the Soviet Union and its allies and conducted their own peripheral and overflight missions Hopkins challenges longstanding beliefs that the flights served to prevent war curtailed needless defense spending and were undertaken by rogue generals bent on starting World War III For the first time he shows the Soviet perspective on the flights and makes a compelling case that reconnaissance flights did not have a sustained adverse effect on Soviet relations with the West Using newly declassified materials interviews with crews and policy makers and his own experience flying strategic reconnaissance missions Hopkins links the daily operations of courageous fliers with decisions by presidents and prime ministers that decided the outcome of the Cold War

Soviet and Russian Military Aircraft in the Americas Yefim Gordon,Dmitriy Komissarov,2016-11-01 The first recipient of Soviet military hardware in the Americas was Cuba in 1959 Since then the Cuban Air Force has operated the MiG 15 to the MiG 29 An 26 and Il 76MD transports and more Cuban combat aircraft have seen action against the ships and aircraft used by the CIA in its subversive activities against Cuba Other Latin American nations have also ordered Russian military aircraft based on common sense and economic expediency rather than political affiliations These include Mexico Brazil neighboring Colombia the Argentina Air Force and Bolivia which is among the latest customers for the Mi 17 with plans to use for drug busting operations Another major customer for Soviet aircraft was Peru which ordered An 26 and An 32 transports MiG 29 fighters Su 20 Su 22 fighter bombers and Su 25 attack aircraft Peruvian Su 22s have been involved in the border conflict with neighboring Ecuador and Soviet aircraft notably Mi 17 and Mi 24 helicopters have been actively used by the Sandinista regime in Nicaragua against the US backed Contras insurgents during the civil war More recently Venezuela another country noted for its anti US stance purchased a large batch of Su 30MKV multi role fighters as well as Mi 17 and Mi 26 helicopters Written by the acknowledged experts in the field and illustrated throughout with photographs and color artwork this is the definitive record of Soviet and Russian military aircraft and their combat operations in this region

Testing Death George J. Marrett,2006-05-30 In 1969 after his return from Vietnam George Marrett took a job as a test pilot at Hughes Aircraft For twenty years he tested the most sophisticated airborne radar and missiles ever designed for advanced Navy and Air Force aircraft Marrett s masterful command of storytelling puts the reader in the cockpit during the F 15 F 16 and F 18 weapons systems flyoff as well as during the firing of a Mach 3 Phoenix missile from an F 14A Tomcat at a Soviet MiG Foxbat target In addition to the weaponry Marrett relives stories of espionage deadly crashes and the development of the B 2 Spirit stealth bomber radar He combines the thrill of test flying with the pathos humor and tragedy that is the everyday life of a test pilot showing how the Cold War was actually won in the skies above Southern California The background to Marrett s tale is the story of Hughes Aircraft While Howard Hughes s huge and unwieldy Spruce Goose never

made it into World War II the Radio Department he started grew to become the electronics giant Hughes Aircraft Company By the 1950s Hughes Aircraft built airborne radar and missiles for all of the Air Force interceptors stationed on the East and West Coasts and along the border with Canada to defend the United States from Soviet bombers In the years that followed the company built airborne radar for the Navy F 14A Tomcat the Air Force F 15A Eagle the Navy F 18A Hornet and the B 2 stealth bomber They also built the Navy air to air AIM 54 Phoenix and the Air Force air to ground AGM 65 Maverick missiles These advanced electronic weapons were developed and fielded during President Reagan s massive buildup of military might Even though Hughes himself did not live to see the Berlin Wall fall in 1989 the company he built made an essential contribution to the collapse of communism Douglas D-558 Peter E. Davies,2019-10-29 This title is a detailed illustrated guide to the Douglas D 558 the ground breaking US Navy research aircraft which became the first aircraft to break Mach 2 and paved the way for America s Cold War Century Series fighters The six Douglas D 558 research aircraft built as two variants were produced for a US Navy and NACA collaborative project to investigate flight in the high subsonic and supersonic regimes and to develop means of coping with the dangerous phenomena of compressibility and pitch up which had caused many accidents to early jets Wind tunnels could not provide the necessary data so pilots had to risk their safety in experimental aircraft which for their time achieved phenomenal performance Both series of D 558 were well designed strong and efficient aircraft which enabled test pilots to tackle the unknown in comparative safety Though delayed by their innovative troublesome power plants and limited by the cost of their air launched sorties they went well beyond their original Mach 1 speed objective and continued to generate information that provided design solutions for a whole generation of supersonic combat aircraft Although the final stage of the D 55 program the USN s militarized D 558 3 never happened the Navy was able to apply the lessons of the program to its much more practical combat types such as the F8U Crusader and F3H Demon Supported by full color artwork including three view plates of the two D 558 models and a technical view of the D 2 cockpit this authoritative text offers a comprehensive guide to the record breaking Navy research craft
