Origins Science in U.S. K-12 Public Schools; Is it Education or Indoctrination? Mark Biedebach,2020-12-23 A Biophysicist and Constitutional Lawyer Address a Profound Question Is it OK for our public schools to teach only Atheistic answers to ultimate religious questions Where do we come from and what is the nature of life These are the two biggies implicitly addressed by U S K 12 origins science education The answers form the foundation for the third How should life be lived ethically and morally The answers to the third will be significantly affected by how we answer the first two The authors show that there are two evidence based alternatives to the first two We either come from unguided material causes without purpose or we come from material and intelligent causes for a purpose The materialistic alternative provides the foundation for non theistic religious answers to questions of ethics and morality while the teleological alternative supports theistic answers The problem is that modern origins science uses a concealed materialistic orthodoxy that permits only Atheistic narratives about the origin of the Universe of life and the diversity of life Thus when these materialistic atheistic explanations are taught by our K 12 public schools the impressionable kids are only given an atheistic narrative rather than an objective education about the evidence for and against both views Calvert the lawyer who switched from stock fraud to Constitutional law 20 years ago explains how the law actually favors the objective rather than the materialistic method for origins science education Atheism is just as religious as theism for First Amendment purposes Accordingly just as the schools cannot push a theistic prayer during the invocation at a high school graduation neither can it adopt or implement an atheistic orthodoxy when teaching origins science He also explains that objectivity is also required as the scientific method for the testing of historical narratives require consideration of all evidence based alternatives At the end the Authors provide a set of ten suggestions for the development of objective standards and curricula for teaching origins science

War of the World Views Ken Ham,Bodie Hodge,Carl Kerby,Dr. Jason Lisle,Stacia McKeever,Dr. David Menton,2006-01-01 What do aliens dinosaurs and gay marriage have in common They are all part of the culture war a war between two worldviews One view is based on a biblical understanding of history the other on pure

naturalism Our educational institutions and the media are on the frontlines of evolutionizing our culture From Biology 101 to World History from The Learning Channel to Sponge Bob subtle and not so subtle evolutionary messages bombard us We witness the battles and skirmishes of this war in our schools our courts and our homes All around us are casualties of the warfare Christians taken captive by an evolutionary philosophy The idea of the big bang and millions of years has duped many Christians and its effects include a deficient gospel and subjective morality How are we to respond when we hear of the latest argument for evolution How can we prepare our children to face the evolutionary indoctrination of our public schools and universities What are we to make of Christian organizations who teach the big bang and millions of years How can we build a truly biblical worldview In this powerful book you will find ammunition for the war answers to some of the most common arguments for evolution analyses of Christian compromise positions and a call for return to the true biblical authority
