**Mind Shift** John Parrington, 2021 Does any other animal experience the richness of our inner lives our ability to imagine to hope to dream to create imaginary worlds John Parrington answers no and considers how we came to be so different even from our nearest primate relatives In this book he argues that a mind shift occurred during our evolution in which tool use and especially the invention of language transformed our brains which not only became larger but subtly altered in their structure and function making them more plastic and open to external influences Words could be used for inner dialogue too leading to the emergence of a sense of self of conscious awareness as a product of brain biology and social interaction An outpouring of art music literature science and technology has been the result but also suffering delusions and despair when this symphonic brain activity goes wrong Parrington considers the evidence for this language and culture driven view of human consciousness and its implications for our mental health Book jacket **Queen, Speak Out** Christine H.

to express myself I write on paper and then I read my words out loud What I love most about poetry is that it has no boundaries and I personally believe that freedom of expression is poetry's best friend Poetry allows me to evolve in so many ways and challenges me to learn more and create art for the mind Sometimes I'm at a loss for words to write at times it takes minutes hours days and months for me to write a new piece Just like any relationship poetry requires patience dedication and understanding Anyone can write a poem if they put their mind to it but to write continuous poetry you need the passion for it Some may view my work as prose or spoken word to me personally they all come from the same family so if you are probably wondering what I write I write poetry
