Ecological Democracy offers an original thought provoking and engaging treatment of why and how democracy should be re imagined in reaction to today s ecological crisis The book explains that one need to re imagine both the view on nature and democratic ideals within the same framework in the Anthropocene the present geological epoch of human made instability in the Earth system and its planetary boundaries This book proposes unique and challenging readings of green political theory and its development of ecological democracy in the last four decades The book is the first to offer a systematic and detailed interpretation of the role of critical theory vis vis green political theory through an update regarding current non anthropocentric critical theorists and how they may contribute to the further development of ecological democracy

Ecological Democracy builds further on deep ecology ecophenomenology and animism by articulating an ecocentric view on nature which defends an intrinsic moral value of all existence as well as formulating the democratic principle of all ecologically affected parties This book provides a sophisticated convincing and accessible argument for how to re imagine ecological democracy as ecocentrism in practice ecological love To love ecologically means caring for and encountering all existence on the Earth and in the cosmos This book is multi disciplinary and will be of great value to researchers as well as undergraduate and postgraduate students from many disciplines The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Radical Ecopsychology Andy Fisher,2012-02-01 Personal in its style yet radical in its vision Radical Ecopsychology offers an original introduction to ecopsychology an emerging field that ties the human mind to the natural world In order for ecopsychology to be a force for social change Andy Fisher insists it must become a more comprehensive and critical undertaking Drawing masterfully from humanistic psychology hermeneutics phenomenology radical ecology nature writing and critical theory he develops a compelling account of how the human psyche still belongs to nature This daring and innovative book proposes a psychology that will serve all life providing a solid base not only for ecopsychological practice but also for a critical theory of modern society

The Philosophical Foundations of Ecological Civilization Arran Gare, 2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to *The Philosophical Foundations of Ecological Civilization* is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization

A Political Theology of

Nature Peter Scott, 2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ's resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological age
