between the grazing animal the pasture and any supplementary feeds are complex involving herbage availability diet selection and substitution To facilitate the application of these recommendations to particular grazing situations readers are directed to decision support tools and spreadsheet programs Nutrient Requirements of Domesticated Ruminants is based on the benchmark publication Feeding Standards for Australian Livestock Ruminants published in 1990 by CSIRO PUBLISHING on behalf of the Standing Committee on Agriculture It provides comprehensive and useful information for graziers livestock advisors veterinarians feed manufacturers and animal nutrition researchers The recommendations described are equally applicable to animals in feedlots or drought yards **Mineral Nutrition History** Lee McDowell,2017-07-20
