**Transcendence in Heidegger's Early Thought** Erik Kuravsky, 2023-11-27 This book demonstrates how Heidegger's departure from ontotheology occurs initially as a preparation for the concept of Dasein's transcendence and subsequently as its explicit development and overcoming Dasein's transcendence is revealed as the foundation for the subsequent concept of Being as an Event which stands in contrast to all ontotheological perspectives that assert a singular a priori foundation of the universe attributed to beings God consciousness or even an independent process of Being that doesn't rely on Dasein The book illustrates that transcendence is not an attribute of human consciousness or a connection to something external to it Instead as a primal act transcendence paves the way for a non representational dwelling in the essence of a historically unfolding Being a contemplative recollection of the truth of Being Throughout the book there is a gradual progression towards an understanding of transcendence as an active engagement wherein we do transcendence This process involves a reconstruction of the ontological significance of action emphasizing its performative embeddedness in existence and its inseparability from Being
