Mysterious Mesoamerican Cultures Norah Romney, Mayan ideas spread via broadcast and influenced divergent cultures and languages It is possible to trace the influence of the Mayan civilization far beyond its confines 400 to 600 A D One or two of these lesser civilizations may have existed contemporaneously with the great Mayan civilization but most were at their best long after the great culture had declined This chapter will emphasize the ties between these lesser civilizations and the Mayas and analyze their characteristics Toward Mexico and the Isthmus of Panama we will proceed northwest Along the Gulf of Mexico and across the Isthmus of Tehuantepec the Mayas developed their arts of life in narrowing bands In terms of importance Comalcalco appears to be the most westerly Mayan city A large ruin is also located near San Andres Tuxtla and the Tuxtla Statuette is among the earliest dated Maya objects Archaic and Maya figurines coexist in this coastal belt where arid and humid conditions coexist Mayan culture may have originated here Little has been studied on the archaeology of this part of Mexico Although the earliest known rubber specimens were found at Chichen Itza s Sacred Cenote the material s ceremonial and practical uses are primarily related to the Olmeca and Totonac cultures In southern Vera Cruz and western Tabasco where the Aztecs later called Nonoalco the Olmeca may be found Ancient Mexican traditions frequently mention this region as a symbol of Maya civilization Incense water proofing drumstick tips etc were all made from rubber There was also a sacred game played with a large rubber ball with goals set high in parallel walls of a specially constructed court which could be compared to basketball Olmeca may have been a Mayan tribe but they may also have spoken Mexican The Olmeca ruled parts of the Mexican highlands before the Toltecs according to Ixtlilxochitl s history When the Toltec empire collapsed they may have fled south for we find a group of this name in Nicaragua at the time of the Conquest

Murder in Latin America W. John Green, 2015-04-27 This expansive history depicts Latin America's pan regional culture of political murder Unlike typical studies of the region which often focus on the issues or trends of individual countries this work focuses thematically on the nature of political murder itself comparing and contrasting its uses and practices throughout the region W John Green examines the entire system of political murder the methods and justifications the perpetrators employ the victims and the consequences for Latin American societies Green demonstrates that elite and state actors have been responsible for most political murders assassinating the leaders of popular movements and other messengers of change Latin American elites have also often targeted the potential audience for these messages through the region's various dirty wars In spite of regional differences elites across the region have displayed considerable uniformity in justifying their use of murder imagining themselves in a class war with democratic forces While the United States has often been complicit in such violence Green notes that this has not been universally true with US support waxing and waning A detailed appendix exploring political murder country by country provides an additional resource for readers [The Birth of Technology in Mesoamerica](#) Ethan Gomez, For thousands of years people in Central America have found ways to improve their lives Tools and technologies help us do more work with less effort and make our lives easier But how did those tools and technologies come about The Maya people were among the first groups to make discoveries that led to new technology in Mesoamerica And now scientists uncover more about these ancient people by using modern technologies like computers and lasers In the past people could only see the universe in one way They could not travel very far or very fast But now that science and technology have changed the world we can see things that were hidden before We have new ways of getting from one place to another and new tools and materials that help us make textiles boats and paper and even understand the past Technology has improved in many ways like finding better ways to get from one place to another For example modern technology has made transportation faster easier and more efficient than it used to be Traveling long distances is much easier than before the invention of trains cars and airplanes Education depends mainly on how effective teaching methods were used back then compared to today's standards therefore without proper instruction methods being utilized by teachers back then there wouldn't be any hope for students success later on down their own paths towards achieving higher learning goals Once again it was scientists using modern technology to help us learn more about the ancient Maya people In Mexico scientists have also studied the old Maya people using modern technology They have discovered that they were more advanced than we thought not just farmers and traders but builders as well The Maya had many things we take for granted today like electricity and airplanes but they also had inventions like books and clocks which we don't have today These discoveries show that even though these fantastic people lived thousands of years ago they could still invent new things back then just like when someone created something today like a bike Archaeologists have found artifacts showing how vital these things were to how these ancient people lived In archaeology the word artifact refers to any object left behind by people in

the past Artifacts can be made of many materials including wood stone and metal Archaeologists study these things to learn more about the people who made them and how they lived A few discoveries have revealed things about the ancient people we never knew For example researchers now know that Mayan culture was more advanced than previously thought The old Maya had a complex social structure religious system and calendar that was far more developed than what was once understood by modern day archaeologists They also had a problematic transportation and textile system all previously misunderstood by archaeologists who studied the civilization s remains The world has changed a lot since the ancient Maya lived But there is still so much we don t know about how they lived and what they thought That s why scientists study these artifacts today They want to learn more about them and their culture so we can learn from them too *Ethnomusicology*
