Popular Music Industries and the State Shane Homan, Martin Cloonan, Jennifer Cattermole, 2015-10-16 This volume studies the relationships between government and the popular music industries comparing three Anglophone nations Scotland New Zealand and Australia At a time when issues of globalization and locality are seldom out of the news musicians fans governments and industries are forced to reconsider older certainties about popular music activity and their roles in production and consumption circuits The decline of multinational recording companies and the accompanying rise of promotion firms such as Live Nation exemplifies global shifts in infrastructure profits and power Popular music provides a focus for many of these topics and popular music policy a lens through which to view them The book has four central themes the changing role of states and industries in popular music activity assessment of the central challenges facing smaller nations competing within larger global music media markets comparative analysis of music policies and debates between nations and also between organizations and popular music sectors analysis of where and why the state intervenes in popular music activity and how and whether music fits within the turn to culture in policy making over the last twenty years Where appropriate brief nation specific case studies are highlighted as a means of illuminating broader global debates

Reclaiming the Future Jane Kelsey, 2000-01-01 The vision of a global future spread through the world like wildfire in the last decade exhilarating for some alarming for others apparently inexorable for all As free market advocates would have it there is no alternative Reclaiming the Future tells a different story that globalization is not inevitable invincible or intrinsically good The deregulated global economy has proved highly unstable The pursuit of unending growth is

unsustainable and the social damage that free markets cause is provoking an international backlash Jane Kelsey explores the impact of globalization on the New Zealand economy Her account of foreign investment and free trade policies the role of the transnationals and the challenges posed by global agreements and networks will open the eyes of readers Reclaiming the Future opens wide the debate New Zealanders are seeking for the direction of their country in the twenty first century

Prescription for the People Fran Quigley,2017-11-15 In *Prescription for the People* Fran Quigley diagnoses our inability to get medicines to the people who need them and then prescribes the cure He delivers a clear and convincing argument for a complete shift in the global and U S approach to developing and providing essential medicines and a primer on how to make that change happen Globally 10 million people die each year because they are unable to pay for medicines that would save them The cost of prescription drugs is bankrupting families and putting a strain on state and federal budgets Patients desperate need for affordable medicines clashes with the core business model of the powerful pharmaceutical industry which maximizes profits whenever possible It doesn't have to be this way Patients and activists are aiming to make all essential medicines affordable by reclaiming medicines as a public good and a human right instead of a profit making commodity In this book Quigley demystifies statistics and terminology offers solutions to the problems that block universal access to medicines and provides a road map for activists wanting to make those solutions a reality

Aid and Development John Overton,Warwick E. Murray,2020-10-06 This book provides an overview of what aid is how it has changed over time and how it is practiced as well as debates about whether aid works for whom and what its future might be The text shows how aid is a contested and fluid concept that involves a wide and changing variety of policies actors and impacts It equips the reader with an understanding of what aid is where it comes from and where it goes how it is delivered and what its impacts are and whether shortcomings are a result of a fundamental problem with aid or merely the result of bad practices It explores the changing political ideologies and conceptions of development that continually reshape how aid is defined implemented and assessed and how despite a global commitment to the Sustainable Development Goals we are at a point where the very notion of aid is being questioned and its future is uncertain Each chapter includes case studies chapter summaries discussions weblinks and further reading to help strengthen the reader's understanding **Aid and Development** provides an important resource for students development workers and policy makers seeking an understanding of how aid works

Current Law Index ,1985 **Living within a Fair Share Ecological Footprint** Robert Vale,Brenda Vale,2013-09-02 According to many authorities the impact of humanity on the earth is already overshooting the earth's capacity to supply humanity's needs This is an unsustainable position This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint The authors describe numerical methods used to calculate this concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological

means such as in Europe North America and Australasia The calculations focus on outcomes rather than on detailed discussion of the methods used The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future The emphasis is on workable practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity
