indispensable book Hitchcock's relation to the built world was informed by an intense engagement with location and architectural form in an era marked by modernism's advance fueled by some of the most creative midcentury designers in film Hitchcock saw elements of the built world not just as scenic devices but as interactive areas to frame narrative exchanges In his films building forms also serve a sentient purpose to capture and convey feelings sensations and moments that generate an emotive response from the viewer Visualizing the contemporary built landscape allowed the director to illuminate Americans everyday experiences as well as their own uncertain relationship with their environment and with each other French shares several untold stories such as the real life suicide outside the Hotel Empire in *Vertigo* which foreshadowed uncannily that film's tragic finale and takes us to the actual buildings that served as the inspiration for Psycho's infamous Bates Motel Her analysis of *North by Northwest* uncovers the Frank Lloyd Wright underpinnings for Robert Boyle's design of the modernist house from the film's celebrated Mount Rushmore sequence and ingeniously establishes the Vandamm House as the prototype of the cinematic trope of the villain's lair She also shows how the widespread unemployment of the 1930s resulted in a surge of gifted architects transplanting their careers into the film industry These practitioners created sets that drew from contemporary design schools of thought and referenced real structures both modern and historic *The Architecture of Suspense* is the first book to document how these great architectural minds found expression in Hitchcock's films and how the director used their talents and his own unique vision to create an enduring and evocative cinematic world Publication of this volume was assisted by a grant from Furthermore a program of the J M Kaplan Fund

**The Art of the Portrait** Norbert Schneider, 2002     *Richard Neutra* Barbara Mac Lamprecht, 2010     Modern American Poetry and the Architectural Imagination Jo Gill, 2023 *Modern American Poetry and the Architectural Imagination* The Harmony of Forms assesses the relationship between architectural and poetic innovation in the United States across the twentieth century Taking the work of five key poets as case studies and drawing on the work of a rich range of other writers architects artists and commentators this study proposes that by examining the sustained and productive if hitherto overlooked engagement between the two disciplines we enrich our understanding of the complexity and interrelationship of both The book begins by tracing the rise of what was conceived of as modern and often international style architecture and by showing how poetry and architecture in the early decades of the century developed in dialogue and within a shared and often transnational context It then moves on to examine the material aesthetic and social conditions that helped shape both disciplines offering new readings of familiar poems and bringing other pertinent resources to light It considers the uses to which poets of the period put the insights of architecture and vice versa In closing Gill turns to modern and contemporary architects written accounts of their own practice in memoirs and other commentaries and examines how they have assimilated or resisted the practice and vision of poetry

Neo-Japonisme, Architectural Photography & Abstraction Jean-Sébastien Cluzel,2024-07-01 What links are there between Piet Mondrian s unfinished work Victory Boogie Woogie 1942 4 and post war Japanese and Japanese style architectural photography As far back as the mid 1950s critics and photographers were inclined to link Mondrian s painting with modern Japanese architecture and some historians were to go so far as to assert that Mondrian himself had been influenced by traditional Japanese architecture Powerful associations such as these contributed to the coming together of Western and Japanese architectural modernity They also underpinned the survival of Japonisme in architecture or put another way of the neo Japonisme that emerged after the Second World War However while this kinship between Mondrian s abstraction and the aesthetic of Japanese architecture is little apparent in architecture it does show in architectural photography This book which takes a sidelong look at Mondrian examines the works of the foremost among Japanese and American architectural photographers in an effort to interpret the dynamics of how the world of architecture was Japanized between 1945 and 1985 *Czech American Bibliography* Miloslav Rechcigl,2011-10-20 This is a comprehensive bibliography of publications relating to Czechs in America from the earliest time since the discovery of the New World to date covering their settlement community life and their contributions to their host country Although emphasis is on English titles including books as well as articles the relevant titles in Czech language have also been included particularly in those areas where there is a paucity of English titles English translations of the Czech titles were normally placed in parentheses To assure maximum utility the bibliography has been organized and classified into specific sectors by subject Under most major headings general surveys are listed first followed by more specific categories which have in turn been subdivided into subcategories Individual entries in all sections are arranged chronologically Under most subject areas separate biographical sections were added comprising individuals of note in the respective fields Apart from providing information on just about every aspect of human endeavor it is hoped that it will induce serious students and scholars to do more work in areas that have not been adequately researched *Tremaine Houses* Volker M. design projects Richard Neutra and Oscar Niemeyer designed the best known Tremain houses Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement Focusing on the Tremaines houses and other projects such as a visitor center at the meteor crater in Arizona this volume explores the Tremaines architectural patronage in terms of the family s motivations and values exposing patterns in what may appear as an eclectic collection of modern architecture Architectural historian Volker M Welter argues that the Tremaines patronage was not driven by any single factor rather it stemmed from a network of motives comprising the clients practical
