*New Age and Neopagan Religions in America* Sarah M. Pike, 2006      *New Age and Neopagan Religions in America* Sarah M. Pike, 2004-07-07 From Shirley MacLaine's spiritual biography *Out on a Limb* to the teenage witches in the film *The Craft* New Age and Neopagan beliefs have made sensationalistic headlines In the mid to late 1990s several important scholarly studies of the New Age and Neopagan movements were published attesting to academic as well as popular recognition that these religions are a significant presence on the contemporary North American religious landscape Self help books by New Age channelers and psychics are a large and growing market annual spending on channeling self help businesses and alternative health care is at 10 to 14 billion an estimated 12 million Americans are involved with New Age activities and American Neopagans are estimated at around 200 000 *New Age and Neopagan Religions in America* introduces the beliefs and practices behind the public faces of these controversial movements which have been growing steadily in late twentieth and early twenty first century America What is the New Age movement and how is it different from and similar to Neopaganism in its underlying beliefs and still evolving practices Where did these decentralized and eclectic movements come from and why have they grown and flourished at this point in American religious history What is the relationship between the New Age and Neopaganism and other religions in America particularly Christianity which is often construed as antagonistic to them Drawing on historical and ethnographic accounts Sarah Pike explores these questions and offers a sympathetic yet critical treatment of religious practices often marginalized yet soaring in popularity The book provides a general introduction to the varieties of New Age and Neopagan religions in the United States today as well as an account of their nineteenth century roots and emergence from the 1960s counterculture Covering such topics as healing gender and sexuality millennialism and ritual experience it also furnishes a rich description and analysis of the spiritual worlds and social networks created by participants      **The Sociology of Religion** George Lundskow, 2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion's practitioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow's approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion

as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will devote particular chapters to important historical moments and movements leaders and various individual religions that have shaped the contemporary form and effect of religion in the world today

**Transhumanism** David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey Blade Runner the Terminator series and more recently The Matrix Limitless Her and Transcendence However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become God Modeled on the medieval legend of the Golem and Frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA's mind control program MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge And as revealed in the movie Lucy through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularity By accumulating the total of human knowledge and providing access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill
