Hughes, 2016-06-14 While many older American cities struggle to remain vibrant New Brunswick has transformed itself adapting to new forms of commerce and a changing population and enjoying a renaissance that has led many experts to cite this New Jersey city as a model for urban redevelopment Featuring more than 100 remarkable photographs and many maps New Brunswick New Jersey explores the history of the city since the seventeenth century with an emphasis on the dramatic changes of the past few decades Using oral histories archival materials census data and surveys authors David Listokin Dorothea Berkhout and James W Hughes illuminate the decision making and planning process that led to New Brunswick's dramatic revitalization describing the

major redevelopment projects that demonstrate the city's success in capitalizing on funding opportunities. These projects include the momentous decision of Johnson Johnson to build its world headquarters in the city, the growth of a theater district, the expansion of Rutgers University into the downtown area, and the destruction and rebuilding of public housing. But while the authors highlight the positive effects of the transformation, they also explore the often heated controversies about demolishing older neighborhoods and ask whether new building benefits residents. Shining a light on both the successes and failures in downtown revitalization, they underscore the lessons to be learned for national urban policy, highlighting the value of partnerships, unwavering commitment, and local leadership. Today New Brunswick's skyline has been dramatically altered by new office buildings, residential towers, medical complexes, and popular cultural centers. This engaging volume explores the challenges facing urban America while also providing a specific case study of a city's quest to raise its economic fortunes and retool its economy to changing needs.

Where the Other Half Lives Sarah Glynn, 2009-05-20 Housing has become a hot topic. The media is filled with stories of individual housing hardship and of major property related financial crises of crippling personal debts, rundown social housing, homelessness, mass demolition, spiralling prices, unaffordability, and global recession. This book links all of these through a radical analysis that puts housing at the heart of critical economic and political debate. The authors show that these problems arise from the fact that houses are no longer seen primarily as homes for living in, but rather as a source of profit. Case studies from the UK, the US, and other western countries are set into an overview of how housing has changed over the last few decades. The book also examines campaigns for better housing and explores possibilities for a different approach to this most fundamental of human needs.

Future Visions of Urban Public Housing (Routledge Revivals) Wolfgang F. E. Preiser, David P. Varady, Francis P. Russell, 2017-08-03 First published in 1994, this book brings together the papers presented at the International Forum on Future Visions of Urban Public Housing held on November 17-20, 1994, in Cincinnati, Ohio. Participants included public housing officials, academics, practitioners, and public housing residents who came together to debate, compare, and analyse practices and issues in urban and public housing in industrialised nations. The 55 collected papers address the following key topics: public housing policy, comprehensive neighbourhood planning for public housing, public housing in the urban design context, quality of design standards and guidelines for public housing, resident participation and enhanced self-sufficiency in public housing, public housing alternatives, revitalising and rehabilitating public housing, the Elderly, Children, and special populations in public housing. The findings suggest new directions for policy and agendas for action.

The Politics of Urban Development Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference
