Managing Defense Transformation Adam N. Stulberg,Michael D. Salomone,2016-05-13 Why are some military organizations more adept than others at reinventing themselves Why do some efforts succeed rapidly while others only gather momentum over time or become sidetracked or even subverted This book explicates the conditions under which military organizations have both succeeded and failed at institutionalizing new ideas and forms of warfare Through comparative analysis of some classic cases US naval aviation during the interwar period German and British armour development during the same period and the US Army s experience with counter insurgency during the Vietnam War the authors offer a novel explanation for change rooted in managerial strategies for aligning service incentives and norms With contemporary policy makers scrambling to digest the lessons of recent wars in Kosovo Afghanistan and Iraq as well as to meet the unfolding challenges of the new revolution in military affairs RMA understanding the sources and impediments to transformation has become critical **Smooth Path or Long and Winding Road?** Kathrin Leuze,2010-07-05 The book uses a comparative study of Germany and Britain to reveal how national institutions shape the labour market careers of higher education graduates It identifies four institutional spheres that are important the structure of higher education systems the content of study the structure of graduate labour markets and labour market flexibility Due to country differences the transition from higher education to work in Germany follows a smooth path while in Britain it is more comparable to a long and winding road *Educational Extension in the United States* Herbert Baxter Adams,1901

Gansser,1920 **Journal of the Military Service Institution of the United States** Military Service Institution of the United States,1890 **The Origins of Victory** Andrew F. Krepinevich,2023-01-01 How the character of war is changing and how militaries can successfully adapt to meet the challenge This book by military strategist Andrew F Krepinevich Jr is the definitive take on the race for military dominance in the twenty first century It shows how militaries that successfully pursue disruptive innovation can gain a major advantage over their rivals while those that fail to do so risk exposing their countries to great danger The Precision Warfare Revolution introduced by the U S military in the First Gulf War found the United States enjoying a near monopoly in this form of warfare for several decades But now other powers have these capabilities The U S military also confronts an emerging military revolution driven by advances across a wide range of technologies from artificial intelligence and synthetic biology to quantum computing and additive manufacturing To stay competitive the U S military must pursue disruptive innovation in a

race with other militaries to exploit war's changing character. Clues exist as to the winner's identity. They are revealed by militaries that went beyond the bounds of mere innovation to overturn the existing forms of warfare, changing the course of history and the fate of nations. Through exploring their experiences, Krepinevich shows how the U.S. military can win the race to identify and exploit the next big thing in warfare. *Handbook on Gender and Public Sector Employment* Hazel
