Rethinking Geographical Explorations in Extreme Environments Marco Armiero, Roberta Biasillo, Stefano Morosini, 2022-07-14 Focusing on extreme environments from Umberto Nobile's expedition to the Arctic to the commercialization of Mt Everest this volume examines global environmental margins how they are conceived and how perceptions have changed Mountaintops and Arctic environments are the settings of social encounters political strategies individual enterprises geopolitical tensions decolonial practises and scientific experiments Concentrating on mountaineering and Arctic exploration between 1880 1960 contributors to this volume show how environmental marginalisation has been discursively implemented and materially generated by foreign and local actors It examines to what extent the status and identity of extreme environments has changed during modern times moving them from periphery to the centre and discarding their marginality The first section looks at ways in which societies have framed remoteness through the lens of commercialization colonialism knowledge production and sport while the second examines the reverse transfer focusing on how extreme nature has influenced societies through international network creation political consensus and identity building This collection enriches the historical understanding of exploration by adopting a critical approach and offering multidimensional and multi gaze reconstructions This book is essential reading for students and scholars interested in environmental history geography colonial studies and the environmental humanities

Writing and Seeing Rui Manuel G. de Carvalho Homem, Maria de Fátima Lambert, 2006 The essays in this volume are informed by a variety of theoretical assumptions and of critical methodologies but they all share an interest in the intersections of word and image in a variety of media This unifying rationale secures the present collection's central position in the current critical context defined as it predominantly is by ways of reading that are based on a relational nexus The intertextual the intermedial the intersemiotic are indeed foregrounded and combined in these essays conceptually as much as in the critical practices favoured by the various contributions Studies of literature in its relation to pictorial genres enjoy a relative prominence in the volume but the range of media and of approaches considered is broad enough to include photography film video television comic strips animated film public art material culture The backgrounds of contributors are likewise diverse culturally academically linguistically The volume combines contributions by prominent scholars and critics with essays by younger scholars from a variety of backgrounds The resulting plurality of perspective is indeed a source of new insights into the relations between writing and seeing and it contributes to making this collection an exciting new contribution to word and image studies
