Companies can thrive only if they are able to create value for shareholders over time. A company

s value creation and the correct approach to its measurement require two main skills first the ability to analyze and evaluate the company s fundamentals with respect to its business model and its performance over time and second knowledge of investors models with regard to risk diversification and return maximization from which the cost of capital for the firm is derived Based on this perspective the book combines rigorous quantitative analysis with effective use of graphics to aid intuitive understanding
