

## SECTION 2 OPERATION

### **Before Using the New Mower:**

Read the Operators manual to become familiar with the machine operation and adjustments.

Lubricate the machine. Refer to the Lubrication section.

Check all nuts and bolts to be sure they are tight.

Model 455 only. Check the tire air pressure.

### **ATTACHING THE MOWER TO THE TRACTOR**

#### **Model 451**

##### **Tractor Requirements**

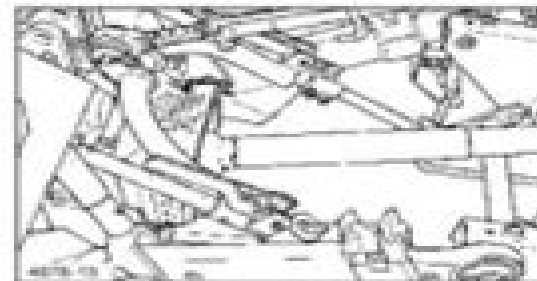

The Model 451 can be attached to either a Category I or II three-point hitch. When attached to a smaller tractor, it may be necessary to add weight to the front of the tractor to provide stability and steering control when weight is transferred from the front wheels as the mower is raised. Follow the tractor manufacturer's recommendation for adding weight.

The tractor must have a 540 RPM PTO.

The Model 451 is shipped with Category I mounting pins. Bushings or optional Category II pins must be used when attaching the mower to a narrow Category II hitch. When attached to a larger Category II hitch that does not allow the lift arms to move close enough together to install the arms on the standard pins, the optional Category II pins must be installed to match the wider spread of the lift arms.

To attach the mower to some smaller tractors it may be necessary to use the optional top link adapter kit to prevent interference between the stabilizer frame and the tractor. Contact your New Holland dealer.

Two bushings are supplied with the mower. These bushings are to be used either at the top link pins or at the top of the stabilizer frame where it attaches to the top link mount on the tractor.
