books have been published on this subject however since the 3rd edition of Urick s classic work 25 years ago and so Dr Ainslie s book will fill a much needed gap in the market Currently up to date information can only be found in different forms and often with conflicting information in various journals conference and textbook publications Dr Michael Ainslie is eminently qualified to write this unique book He has worked on sonar performance modeling problems since 1983 He has written many peer reviewed research articles and conference papers related to sonar performance modeling making contributions in the fields of sound propagation and detection theory Motorboating - ND ,1983-01 Vegetable Diseases Steven T. Koike,Peter Gladders,Albert Paulus,2006-12-14 Our dependence on healthy vegetable crops as a reliable source of food transcends all barriers of nation and culture Consumers now demand excellent quality from the industry that produces large volumes of high quality vegetables to be sold locally regionally and shipped internationally The diseases that affect vegetables compromise such quality *Speech and Language Disorders in Bilinguals* Alfredo Ardila,Eliane Ramos,2007 During the last years a significant number of papers books and monographs devoted to speech and language impairments in bilingual children have been published Different aspects and questions have been approached and today we have a relatively good understanding of the specific characteristics of the speech and language difficulties potentially observed in bilingual and multilingual children This interest has been significantly resulted from the potential developmental and educational consequences of bilingualism Our understanding of the communication disorders in adult populations is notoriously more limited even though over 50% of the adult population can speak at least another language in addition to his her native language That simply means that over 50% of the communication disorders observed in adults are bilingual speech and language disorders bilingual aphasias bilingual dementias bilingual stuttering etc This book was written with the specific purpose of filling this gap The major purpose of this book has been to integrate the state of the art on the different aspects of the communication disorders observed in adult bilinguals The book is organised in such a way that an integrated perspective of bilingualism is presented from the normal conditions to the pathology from the clinical descriptions to the rehabilitation issues from the biological factors to the cultural variables
