

NEW HOLLAND **TWISTER OPERATION AND ADJUSTMENT** **MODEL** **HAYLINER 278 BALER**

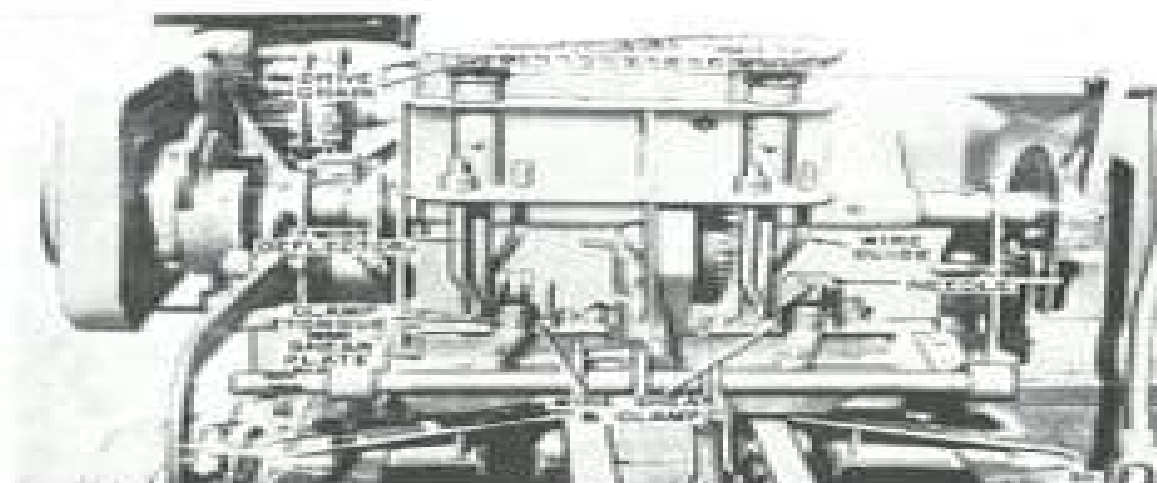

FIGURE 1

OPERATION

Your New Holland—wire tie baler is designed to provide long years of consistent tying and trouble-free operation. It is capable of tying a firm and compact bale using wire. The wire tied bale is very desirable for shipping or for long periods of storage.

Figure 1 shows some of the basic parts of twisting mechanism which identify New Holland's dependable wire tying machine.

Figure 2 shows a typical twist as it should be made by this machine. Each wire has been twisted three complete revolutions.

FIGURE 2

The crimp as indicated at Point A, Figure 2, is typical of a well adjusted wire shear and clamp. It is this clamp which holds the No. 1 wire while the bale is being formed as shown in Figure 3.
