Vision and Society John Clammer, 2014-03-26 The sociology of art is now an established sub discipline of sociology But little work has been done to explore the implications not of society on art but of art on the nature and principles of sociology itself Vision and Society explores the ways in which art here mainly understood as visual art structures in fundamental ways the constitution of

society the relations between societies and the ways in which society and culture should be theorized Building initially on an unfulfilled project by the French sociologist of art Nathalie Heinich to derive a sociology from art this book pushes this idea in unconventional directions Rethinking the relationships between the study of art and the study of sociology and anthropology this book explores how this rethinking might impact sociological theory in general and certain aspects of it in particular especially the study of social movements social change the urban the constitution of space and the ways in which human social relationships are mediated and expressed **Vernacular Architecture Newsletter** ,1998 **Gandhinagar**

Ravi Kalia,2004 The culmination of Ravi Kalia s trilogy on the formation of capital cities in postcolonial India Gandhinagar joins the historian s other two volumes on Chandigarh and Bhubaneswar in tracing India s efforts to establish its twentieth century architectural identity In following the development of these cities Kalia recounts India s progression through precolonial British modern and postmodern theory and practice particularly the architectural ideology propagated by Western architects Le Corbusier and Louis Kahn Kalia explains that Gandhinagar the capital of Gujarat in western India became a battleground for the competing ideals that had surfaced during the building of Chandigarh and Bhubaneswar The mill owners of the neighboring city of Ahmedabad backed by Indian architect and planner Balkrishna Doshi wanted the American Louis Kahn to build Gandhinagar as a worthy rival to Le Corbusier s Chandigarh There was however tremendous political pressure to make Gandhinagar a purely Indian enterprise partly because the state of Gujarat was the birthplace of Mahatma Gandhi Doshi and then by American trained H K Mewada who had apprenticed with Le Corbusier in Chandigarh Kalia shows that unlike the other two cities Gandhinagar would become emblematic of Gandhian ideals of swadeshi indigenous goods and swaraj self rule Exploring the impact of modernist architecture on India as a whole Kalia suggests that the style gained acceptance because its parsimonious designs and unadorned spaces never represented a threat to a religiously pluralist country anxious to create a secular identity He explains how two competing versions of Indian history and ideology Gandhi s and Jawaharlal Nehru s employed modernism s ideals for their own separate ends Serving two masters as Kalia illustrates created constrictions and tensions evident in the building of Gandhinagar and in the careers of many Indian architects including Doshi Charles Correa and Achyut Kanvinde Asian Alterity: With Special Reference To Architecture And Urbanism Through The Lens Of Cultural Studies William Siew Wai Lim,2007-12-04 Asian Alterity is an interdisciplinary theoretical analysis that vigorously contests the homogeneity of the mainstream Eurocentric values Part I argues for the need for an alternate perspective to be introduced so as to understand the diversity of Asia s cultural differences at their varied development stages and to meet the complex challenges of the explosive urban expansion and disruptive changes in traditional cultures and lifestyles Part II of the book consists of nine case studies of Asian major urban cities by well established academic writers and urban theorists Each author presents diverse aspects of urban dynamism The case studies will collectively demonstrate a broad framework to understand the essentiality of the interdisciplinary mode of

Cultural Studies as an important lens towards meeting the challenges in Asian Architecture and Urbanism Highlights of the book *Vernacular Traditions* Aishwarya Tipnis, 2012-01-01 The book is an attempt to bridge the gap between the past and the future the vernacular and the contemporary It questions the relevance of the vernacular in contemporary times and illustrates the inherent sustainability in vernacular built form Emphasizing on the fact that apart from the preservation of vernacular architecture it is more important to carry forward the valuable lessons of the past into the future the book presents myriad examples of contemporary architectural works and showcases how vernacular traditions can be reinterpreted to form contemporary buildings It encourages young designers to look within India for models of sustainable design rather than importing international designs which may or may not be relevant to the Indian context
