Computer Algebra J. Calmet, 1982-10-08. **Handbook of Normative Data for Neuropsychological Assessment** Maura Mitrushina, Kyle B. Boone, Jill Razani, Louis F. D'Elia, 2005-02-10. When *Handbook of Normative Data for Neuropsychological Assessment* was published in 1999, it was the first book to provide neuropsychologists with summaries and critiques of normative data for neuropsychological tests. The Second Edition, which has been revised and updated throughout, presents data for 26 commonly used neuropsychological tests, including Trailmaking, Color Trails, Stroop, Color Word Interference, Auditory Consonant Trigrams, Paced Auditory Serial Addition, Ruff 2 and 7, Digital Vigilance, Boston Naming, Verbal Fluency, Rey-Osterrieth Complex Figure, Hooper Visual Fluency, Design Fluency, Tactual Performance, Wechsler Memory Scale-Revised, Rey Auditory Verbal Learning, Hopkins Verbal Learning, WHO/UCLA Auditory Verbal Learning, Benton Visual Retention, Finger Tapping, Grip Strength, Dynamometer, Grooved Pegboard, Category and Wisconsin Card Sorting tests. In addition, California Verbal Learning, CVLT and CVLT-II, CERAD List Learning and selective Reminding Tests, as

well as the newest version of the Wechsler Memory Scale WMS III and WMS IIIA are reviewed. Locator tables throughout the book guide the reader to the sets of normative data that are best suited to each individual case depending on the demographic characteristics of the patient and highlight the advantages associated with using data for comparative purposes. Those using the book have the option of reading the authors' critical review of the normative data for a particular test or simply turning to the appropriate data locator table for a quick reference to the relevant data tables in the Appendices. The Second Edition includes reviews of 15 new tests. The way the data are presented has been changed to make the book easier to use. Meta-analytic tables of predicted values for different ages and education where relevant are included for nine tests that have a sufficient number of homogeneous datasets. No other reference offers such an effective framework for the critical evaluation of normative data for neuropsychological tests. Like the first edition, the new edition will be welcomed by practitioners, researchers, teachers, and graduate students as a unique and valuable contribution to the practice of neuropsychology.

Handbook of Child Custody Mark L. Goldstein, 2015-08-03. This authoritative reference brings together leading experts for up-to-date theory, findings, and guidelines on the core aspects of child custody evaluations. Contributors offer steps for gathering more accurate family data through home observations, interviews, and collateral information. Chapters examine psychological assessment tools commonly used in evaluations, including measures relating to parenting competencies, mental illness, domestic violence, and substance abuse, and consider increasingly salient issues such as relocation and families in therapy. The section on case studies shows best practices applied in real-life custody situations, and a chapter authored by a family court judge offers a rarely seen perspective from the bench. Featured in the Handbook: A survey of ethical and professional issues; Observing and interviewing children, adolescents, and adults; Psychological assessment and personality testing; A detailed review of the Bricklin scales; Specialized issues including parental alienation, attachment, cults, and more; Illustrative case studies and psychological reports. Mental health professionals who conduct child custody evaluations, including psychiatrists, clinical psychologists, clinical social workers, family and marriage counselors, and licensed clinical professional counselors, will appreciate the *Handbook of Child Custody*. Family law attorneys will also find the Handbook useful in assisting them in child custody litigation. Its thorough coverage will aid evaluators in making recommendations that are professional, ethical, and impartial, and family lawyers in understanding the evaluation process and preparing for expert testimony.
