**Learning Strategies and Cultural Evolution during the Palaeolithic** Alex Mesoudi, Kenichi Aoki, 2015-04-30 This volume is motivated by the desire to explain why Neanderthals were replaced by modern humans in terms of cultural differences between the two sub species It provides up to date coverage on the theory of cultural evolution as is being used by anthropologists archaeologists biologists and psychologists to decipher hominin cultural change and diversity during the Palaeolithic The contributing authors are directly involved in this effort and the material presented includes novel approaches and findings Chapters explain how learning strategies in combination with social and demographic factors e g population size and mobility patterns predict cultural evolution in a world without the printing press television or the Internet Also addressed is the inverse problem of how learning strategies may be inferred from actual trajectories of cultural change for example as seen in the North American Palaeolithic Mathematics and statistics a sometimes necessary part of theory are explained in elementary terms where they appear with details relegated to appendices Full citations of the relevant literature will help the reader to further pursue any topic of interest

*Understanding Cultural Transmission in Anthropology* Roy Ellen, Stephen J. Lycett, Sarah E. Johns, 2013-08-01 The concept of cultural transmission is central to much contemporary anthropological theory since successful human

reproduction through social systems is essential for effective survival and for enhancing the adaptiveness of individual humans and local populations Yet what is understood by the phrase and how it might best be studied is highly contested This book brings together contributions that reflect the current diversity of approaches from the fields of biology primatology palaeoanthropology psychology social anthropology ethnobiology and archaeology to examine social and cultural transmission from a range of perspectives and at different scales of generalization The comprehensive introduction explores some of the problems and connections Overall the book provides a timely synthesis of current accounts of cultural transmission in relation to cognitive process practical action and local socio ecological context while linking these with explanations of longer term evolutionary trajectories

**New Advances in the History of Archaeology** Sophie A. de Beaune, Alessandro Guidi, Oscar Moro Abadía, Massimo Tarantini, 2021-09-16 This volume presents papers from three sessions organised by the History of Archaeology Scientific Commission at the 18th UISPP World Congress Paris June 2018

considering the development of stratigraphical methods in archaeology in many European countries and interdisciplinary perspectives on the history of archaeology

**Convergent Evolution in Stone-Tool Technology** Michael J. O'Brien, Briggs Buchanan, Metin I. Eren, 2024-05-21 Scholars from a variety of disciplines consider cases of convergence in lithic technology when functional or developmental constraints result in similar forms in independent lineages Hominins began using stone tools at least 2.6 million years ago perhaps even 3.4 million years ago Given the nearly ubiquitous use of stone tools by humans and their ancestors the study of lithic technology offers an important line of inquiry into questions of evolution and behavior This book examines convergence in stone tool making cases in which functional or developmental constraints result in similar forms in independent lineages Identifying examples of convergence and distinguishing convergence from divergence refutes hypotheses that suggest physical or cultural connection between far flung prehistoric toolmakers Employing phylogenetic analysis and stone tool replication the contributors show that similarity of tools can be caused by such common constraints as the fracture properties of stone or adaptive challenges rather than such unlikely phenomena as migration of toolmakers over an Arctic ice shelf Contributors R Alexander Bentley Briggs Buchanan Marcelo Cardillo Mathieu Charbonneau Judith Charlin Chris Clarkson Loren G Davis Metin I Eren Peter Hiscock Thomas A Jennings Steven L Kuhn Daniel E Lieberman George R McGhee Alex Mackay Michael J O'Brien Charlotte D Pevny Ceri Shipton Ashley M Smallwood Heather Smith Jayne Wilkins Samuel C Willis Nicolas Zayns

**Microlithic Industries in Northern and Eastern Africa** Latifa Sari, Giuseppina Mutri, 2022-11-22 This book addresses the question of variability in backed bladelet based technologies It also examines the role of LSA microlithic industries as adaptive strategies for coping with paleoenvironmental changes in North Africa The multidisciplinary research activities conducted in caves and open air sites in North Africa over the past two decades have highlighted the importance of this region for understanding the development of LSA microlithic technologies in Africa This book therefore enriches the debate

of origin and the spread of Late Pleistocene microlithic technologies in North Africa and beyond Previously published in African Archaeological Review Volume 37 issue 3 September 2020      **Beyond the Meme** Alan C. Love, William Wimsatt, 2019-09-03 Interdisciplinary perspectives on cultural evolution that reject meme theory in favor of a complex understanding of dynamic change over time How do cultures change In recent decades the concept of the meme posited as a basic unit of culture analogous to the gene has been central to debates about cultural transformation Despite the appeal of meme theory its simplification of complex interactions and other inadequacies as an explanatory framework raise more questions about cultural evolution than it answers In *Beyond the Meme* William C Wimsatt and Alan C Love assemble interdisciplinary perspectives on cultural evolution providing a nuanced understanding of it as a process in which dynamic structures interact on different scales of size and time By focusing on the full range of evolutionary processes across distinct contexts from rice farming to scientific reasoning this volume demonstrates how a thick understanding of change in culture emerges from multiple disciplinary vantage points each of which is required to understand cultural evolution in all its complexity The editors provide an extensive introductory essay to contextualize the volume and Wimsatt contributes a separate chapter that systematically organizes the conceptual geography of cultural processes and phenomena Any adequate account of the transmission elaboration and evolution of culture must this volume argues recognize the central roles that cognitive and social development play in cultural change and the complex interplay of technological organizational and institutional structures needed to enable and coordinate these processes Contributors Marshall Abrams U of Alabama at Birmingham Claes Andersson Chalmers U of Technology Mark A Bedau Reed College James A Evans U of Chicago Jacob G Foster U of California Los Angeles Michel Janssen U of Minnesota Sabina Leonelli U of Exeter Massimo Maiocchi U of Chicago Joseph D Martin U of Cambridge Salikoko S Mufwene U of Chicago Nancy J Nersessian Georgia Institute of Technology and Harvard U Paul E Smaldino U of California Merced Anton T rnberg U of Gothenburg Petter T rnberg U of Amsterdam Gilbert B Tostevin U of Minnesota      **PaleoAmerican Archaeology in Virginia** Wm Jack Hranicky, 2017-10-10 This book is a full color study of over 500 pre Clovis stone artifacts of Virginia With the 22K year date of the Cinmar bipoint in Virginia there is ample evidence of artifact classes that are older than Clovis Over 50 tool types are illustrated and discussed Artifact single site collections are documented The book argues the differences between Holocene biface technology with the blade and core technology of the Pleistocene era The requirements for identifying Pleistocene artifacts is presented such as platforms remaining cortex and invasive retouch They are presented in a tool model Major stones namely jasper are discussed as a lithic determinism The east coast distribution is presented for various tool types Additionally as a major focus cross Atlantic flake blade identical tools from Europe are illustrated with Middle Atlantic artifacts Artifact ergonomics such as right left handed tools hypothetical tool center are argued Structural and functional axis are shown and described on how to identify them on tools Overall this book presents an initiating view of the archaeology needed to study

Pleistocene era artifacts on the American east coast      **Clovis** Ashley M. Smallwood, Thomas A. Jennings, 2014-12-01 New research and the discovery of multiple archaeological sites predating the established age of Clovis 13 000 years ago provide evidence that the Americas were first colonized at least one thousand to two thousand years before Clovis These revelations indicate to researchers that the peopling of the Americas was perhaps a more complex process than previously thought The Clovis culture remains the benchmark for chronological technological and adaptive comparisons in research on peopling of the Americas In Clovis On the Edge of a New Understanding volume editors Ashley Smallwood and Thomas Jennings bring together the work of many researchers actively studying the Clovis complex The contributing authors presented earlier versions of these chapters at the Clovis Current Perspectives on Chronology Technology and Adaptations symposium held at the 2011 Society for American Archaeology meetings in Sacramento California In seventeen chapters the researchers provide their current perspectives of the Clovis archaeological record as they address the question What is and what is not Clovis

**The Evolution of Paleolithic Technologies** Steven L. Kuhn, 2020-09-14 The Evolution of Paleolithic Technologies provides a novel perspective on long term trajectories of evolutionary change in Paleolithic tools and tool makers Members of the human lineage have been producing stone tools for more than 3 million years These artefacts provide key evidence for important evolutionary developments in hominin behaviour and cognition Avoiding conventional approaches based on progressive stages of development this book instead examines global trends in six separate dimensions of technological behaviour between 2 6 million and 10 000 years ago Combining these independent trends results in both a broader and a more finely punctuated perspective on key intervals of change in hominin behaviour To draw this picture together the concluding section explores behavioural cognitive and demographic implications of developments in material culture and technological procedures at seven key intervals during the Pleistocene Researchers interested in Paleolithic archaeology will find this book invaluable It will also be of interest to archaeologists researching stone tool technology and to students of human evolution and behavioural change in prehistory      Dynamics of Learning in Neanderthals and Modern Humans Volume 1 Takeru Akazawa, Yoshihiro Nishiaki, Kenichi Aoki, 2013-12-16 This volume presents the first of two proceedings from the International Conference on the Replacement of Neanderthals by Modern Humans which took place in Tokyo in November 2012 Focussing on a highly innovative working hypothesis called the learning hypothesis which attempts to explain the replacement as a result of differences in the learning abilities of these two hominid populations the conference served as the latest multidisciplinary discussion forum on this intriguing Palaeoanthropological issue The present volume reports on outcomes of the conference in three major sections Part 1 provides an archaeological overview of the processes of replacement assimilation of Neanderthals by modern humans Part 2 consists of archaeological and ethnographic case studies exploring evidence of learning behaviours in prehistoric and modern hunter gatherer societies Part 3 presents a collection of papers that directly contributes to the definition validation and testing of the learning hypothesis in terms of population

biology and evolutionary theory A total of 18 papers in this volume make available to readers unique cultural perspectives on mechanisms of the replacement assimilation of Neanderthals by modern humans and suggested relationships between these mechanisms and different learning strategies

**From Hard Rock to Heavy Metal** Michelle Rae Bebbler, Christopher B. Wolff, 2025-07-01 The discovery and development of metals as tool media is a topic of global interest This phenomenon is generally associated with sedentary agricultural societies however in North America metal use by hunter gatherer populations began as early as 9 000 years ago and continued into modern times The regional and cultural diversity of research in this volume contributes to how we conceptualize hunter gatherer innovation technological proficiency and complex decision making in the past Readers are challenged to reconsider long held assumptions about how when and under what conditions metal became a part of humanity s story

**Discovering World Prehistory** Mark Q. Sutton, 2022-02-27 Discovering World Prehistory introduces the general field of archaeology and highlights for students the difference between obtaining data basic archaeology and interpreting those data into a prehistory a coherent model of the past The opening section of the book covers the history methods and techniques of archaeology to provide a detailed examination of archaeological investigation It highlights the excitement of archaeological discovery and how archaeologists analyze and interpret evidence The second half

covers global prehistory and shows how archaeological data is interpreted through theoretical frameworks to create a picture of the past Starting with human evolution chapters detail the key stages from around the world of prehistory finishing with the transition to post prehistoric societies Including chapter overviews highlight boxes chapter summaries key concepts and suggested reading Discovering World Prehistory is designed to support introductory courses in archaeology and allows students to experience both methods and interpretation offering a perfect introduction to the discipline

Eren, Briggs Buchanan, 2022-07-18 Calculating the diversity of biological or cultural classes is a fundamental way of describing analyzing and understanding the world around us Understanding archaeological diversity is key to understanding human culture in the past Archaeologists have long experienced a tenuous relationship with statistics however the regular integration of diversity measures and concepts into archaeological practice is becoming increasingly important This volume includes chapters that cover a wide range of archaeological applications of diversity measures Featuring studies of archaeological diversity ranging from the data driven to the theoretical from the Paleolithic to the Historic periods authors illustrate the range of data sets to which diversity measures can be applied as well as offer new methods to examine archaeological diversity

**A Global History of The Earlier Palaeolithic** Mark J. *Thinking Big: How the Evolution of Social Life Shaped the Human Mind* Robin Dunbar, Clive Gamble, John Gowlett, 2014-06-17 A closer look at genealogy incorporating how biological anthropological and technical factors can influence human lives We are at a pivotal moment in understanding our

remote ancestry and its implications for how we live today The barriers to what we can know about our distant relatives have been falling as a result of scientific advance such as decoding the genomes of humans and Neanderthals and bringing together different perspectives to answer common questions These collaborations have brought new knowledge and suggested fresh concepts to examine The results have shaken the old certainties The results are profound not just for the study of the past but for appreciating why we conduct our social lives in ways and at scales that are familiar to all of us But such basic familiarity raises a dilemma When surrounded by the myriad technical and cultural innovations that support our global urbanized lifestyles we can lose sight of the small social worlds we actually inhabit and that can be traced deep into our ancestry So why do we need art religion music kinship myths and all the other facets of our over active imaginations if the reality of our effective social worlds is set by a limit of some one hundred and fifty partners Dunbar's number made of family friends and useful acquaintances How could such a social community lead to a city the size of London or a country as large as China Do we really carry our hominin past into our human present It is these small worlds and the link they allow to the study of the past that forms the central point in this book
