In the updated Second Edition, part I guides students through six elements that comprise a clearly defined and focused venture: defining your target industry, defining your target customers, defining the needs and wants of those customers, defining winning product and service solutions, carefully designing a strong business model, determining competitive positioning, and then testing the entire concept against a small population of target customers, all before writing the plan. Think design, test, and learn are the guiding principles. Part II then focuses on different types of investors and the process for raising capital, creating realistic financial projections, writing a concise but powerful business plan, organizing the venture team, and creating a compelling pitch that speaks to the needs and concerns of investors. The book also includes a number of independent case studies that focus on product, service, and business model innovation, all from recent ventures by students as well as recent college or master's level graduates.
